200TH ANNIVERSARY OF THE BOTANIC GARDENS IN LJUBLJANA (2010)

200. obletnica ustanovitve Botaničnega vrta v Ljubljani (2010)

200TH ANNIVERSARY OF THE BOTANIC GARDENS IN LJUBLJANA (2010)

Nominalna vrednost: 2 €
Teža: 8,50 grama
Premer: 25,75 milimetra
Sestava: jedro – tri plasti: Ni-medenina, Ni, Ni-medenina
kolobar: Cu-Ni
Izdelano: 5000 kosov

Nominal value: €2
Weight: 8.5 g
Diameter: 25.75 mm
Composition: three-layered centre: nickel brass, nickel, nickel brass
ring: cupronickel
Issued: 5,000 pieces

Botanični vrt v Ljubljani je poleg Narodne in univerzitetne knjižnice najstarejša kulturna, znanstvena in izobraževalna ustanova z neprekinjenim delovanjem v Sloveniji. Ustanovljen je bil leta 1810. Zasnoval ga je Franc Hladnik, ki je bil njegov prvi ravnatelj. Danes raste v Botaničnem vrtu v Ljubljani na 2 hektarjih prek 4500 rastlinskih vrst, podvrst in oblik, od katerih je več kot tretjina domačih, druge rastline pa so iz različnih območij Evrope. V vrtu gojijo rastline, ki spadajo med ogrožene ali so v naravi v Sloveniji že izginile.

Alongside the National and University Library, the Botanic Gardens in Ljubljana are Slovenia's oldest continuously operating cultural, scientific and educational institution. Opened in 1810, they were designed by Franc Hladnik, who also was the first director. Today the Botanic Gardens cover two hectares, with more than 4,500 species, sub-species and varieties, of which more than a third are from Slovenia, while others are from various parts of Europe. The gardens are also home to endangered plants, and even species that have vanished from the natural environment in Slovenia.
