Consumer prices increased by 0.1% last December, and by 0.6% in December 2002. Year-on-year consumer price growth consequently fell from 5.1% in November to 4.6% in December. The downward trend in other indicators of price growth, core inflation, retail prices and producer prices has also been continuing.

The fall in inflation and inflation expectations enabled the Bank of Slovenia to cut its interest rates by 0.25 percentage points in early January. The Bank of Slovenia adjusted the current rate of depreciation of the tolar accordingly, slowing it from 2.5% to 2.25%. The adjustment of both interest rates and depreciation are geared towards a smooth transition to ERM2 and timely fulfillment of the Maastricht criteria.

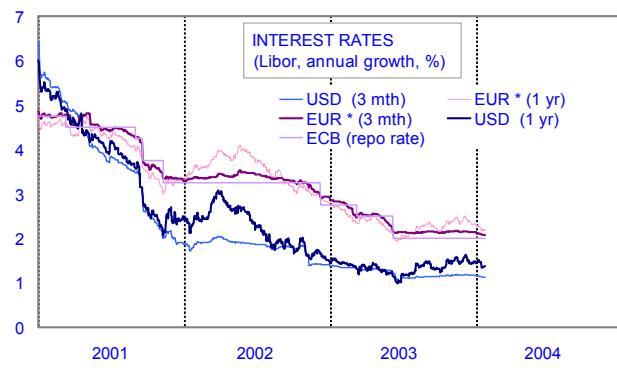

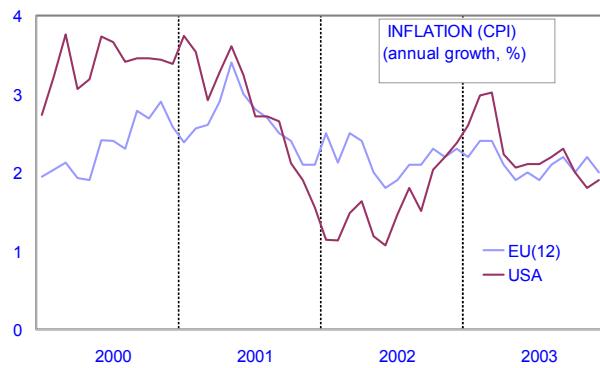

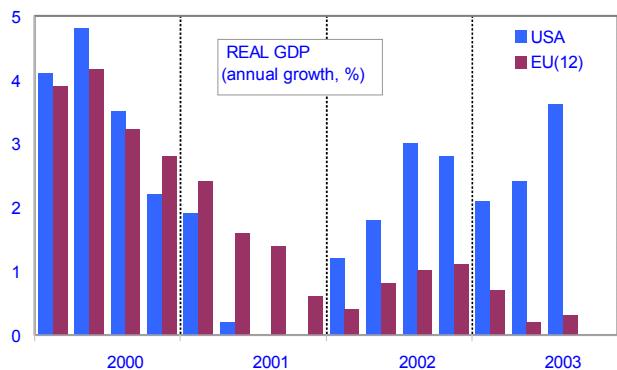

Data up to November indicate that economic growth in Slovenia during the last quarter of 2003 was higher and more export-driven than in the first three quarters of the year. Real GDP growth was 2.3% in the third quarter and is estimated to have been 2.4% for the year as a whole. The stronger growth of industrial production evident since autumn last year is accelerating further.

A modest surplus in the current account of the balance of payments and modest net financial inflow have resulted in balanced foreign exchange markets. In November and December excess demand across all foreign exchange market segments amounted to only EUR 18.4 million. Excess demand for foreign exchange was somewhat higher in the first half of January. Year-on-year growth in the euro exchange rate on the foreign exchange market was 2.9% in November and 2.8% in December.

Lending was fairly strong in the last quarter of last year, mainly due to increased borrowing by enterprises. Year-on-year in December, loans to enterprises grew by 17.6%, loans to households by 10.8% and loans to general government by 7.8%. In spite of stronger lending, twelve-month growth in broad money to December remained low due to the modest scale of balance of payments inflows, and was less than 5%. Growth of transactions money was up somewhat towards the end of the year, reflecting normal seasonal effects, and was somewhat over 10% in the twelve months to December.

Despite the favourable trends in evidence at the end of last year, there continue to be risks going into 2004. The current outlook is for continued high oil prices. Slow recovery in the euro area and a high oil price may have an adverse effect on the Slovenian economy. Surveys showed that business confidence dipped towards the end of 2003.

1. INTERNATIONAL ENVIRONMENT

Economic growth forecasts for the United States this year have been revised upwards while those for the euro area remain unchanged. The upward revision of US economic growth forecasts for 2004 reflects the relatively strong growth recorded in the third quarter of 2003, when the US economy expanded by 3.6% year-on-year and by 2.0% over the quarter. The new forecast is for 4.6% growth this year. The growth forecast for the euro area in 2004 remains 1.8%. The main factor of uncertainty over the forecast for European economic growth continues to be the strong appreciation of the euro vis-à-vis the US dollar and its impact on exports of euro area countries.

The euro rose strongly against the US dollar in 2003. This trend continued during the first half of January. The appreciation of the euro against the US dollar averaged almost 21% between December last year and December the year before. Reasons cited include the large budget and trade deficits of the United States as well as the slow recovery of the labour market. The euro continued to rise in the first half of January this year. By the middle of the month it had reached USD 1.28 following worse-than-expected US employment figures. Neither the US central bank system (the Federal Reserve) nor the ECB are currently showing a readiness to intervene on the currency market by adjusting their

interest rates. The main interest rates remain at 1% in the United States and 2% in the euro area.

Inflation in the United States and EU(12) last year was somewhere above 2%. Growth in food prices has been the main cause of inflation recently. Average annual inflation last year was 2.3% in the United States and 2.1% in EU(12). Year-on-year price growth in December was slightly lower than average inflation for the year and stood at 1.9% in the United States and 2.0% in EU(12). Higher food prices were again the main factor in inflation in both economies in December, as in November, accounting for 0.5 percentage points of year-on-year price growth in the United States and 0.4 percentage points in the euro area.

The average oil price reached USD 29 a barrel last year, up 16% on the previous year. The price continued to rise into 2004, and current forecasts suggest that prices will remain high during the spring. In December last year a barrel of Brent cost on average close to USD 30, while in January this year the price was approaching USD 32. The rising trend began last April, when the oil price was still in the region of USD 25 a barrel (having fallen due to the end of uncertainty over military intervention in Iraq). The recent rise is mainly due to the cold winter and consequent increase in demand for oil in the United States, where oil stocks are

diminishing rapidly. How the oil price moves during the course of the spring will depend largely on the outcome of

Notes: Figures in parentheses indicate the month referred to except for economic growth, where they represent the forecast for the year as a whole

the meeting of OPEC member states on 10 February to decide production quotas. The OPEC members are currently not opposing the high oil price because of the weakness of the dollar. In addition, demand for oil falls off in the spring months because of the warmer weather. The feeling among analysts is therefore that OPEC will not raise production quotas in February. The oil price is consequently likely to remain high. In 2003 the average oil price reached USD 29 a barrel, up 16% on 2002 when it was USD 25 a barrel. This was due partly to tension in Iraq and partly to low oil stocks in combination with global economic recovery and the failure of oil supply to match increased demand.

2. REAL SECTOR

Economic activity

Data up to November indicate that economic growth in Slovenia during the last quarter of 2003 was higher and more export-driven than in the early part of the year. We estimate that the relatively rapid growth of consumer spending continued in the last quarter of the year, while the strong growth of investment spending observed during the first nine months came to a halt at

least temporarily. Government spending was also relatively restrained. Trends in foreign trade were more favourable, with growth of export volumes keeping pace with import growth more closely than in the previous period, when the contribution of foreign trade to economic activity turned sharply negative, worsening from +1.5 percentage points in the third quarter of 2002 to -2.2 percentage points in the third quarter of 2003. We nevertheless estimate that the contribution of foreign trade to GDP growth in the last quarter of the year was again negative, mainly on account of the low level of trade in services. Based on the figures currently available, GDP growth in the last quarter was between 2.5% and 3%, with the result that our estimate of GDP growth for the whole year is somewhat below 2.5%. Official GDP figures from the Statistical Office of the Republic of Slovenia for the last quarter of 2003 will be released by the end of March.

Exceptional growth in industrial production confirms the turnaround of activity in the second half of last year. Annualised monthly growth rate sped up further in November to over 20%, higher than in any month in the last year and a half. This trend is linked to a rapid growth in inventories, as well as to an increase in exports. November saw a change in the composition of growth in aggregate industrial production, with the rapid growth now being driven not by the production of capital goods but mainly by the production of consumption goods, which is currently exhibiting exceptional growth (at an annualised rate of almost 40%), while averaging year-on-year growth of little more than one per cent over the eleven months.

The level of activity in other areas of the economy is fairly favourable. Whereas the high level of activity in construction in the previous period had been due to roadbuilding, in October it was building construction in which the value of activity grew strongly. The relatively strong growth of retail sales was primarily due to sales of motor vehicles and non-foods, indicating strong demand and purchases of durables. Volume figures for tourism at the end of the year showed fewer visits and overnight stays compared with autumn 2002.

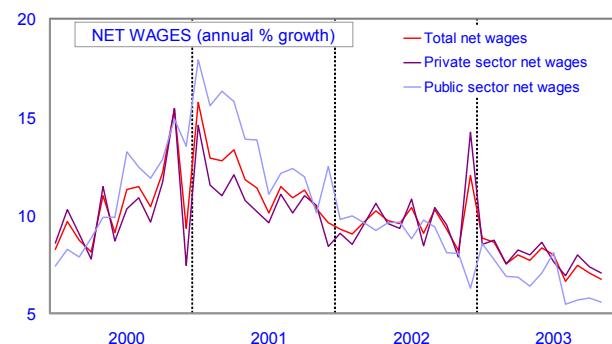

Business confidence surveys at the end of the year showed a dip in optimism compared with previous months. In spite of the clear improvement in the state of the economy at the end of the year, the survey results are not improving as markedly as in the first half of the year. Year-on-year in December all indicators of sentiment regarding the current situation and outlook were down, with the exception of a slight improvement in estimating the current export situation. The biggest declines were

noticed in expectations of demand and exports for the next few months.

The labour market

After being fairly strong in September and October, growth in total receipts slowed sharply in November. The biggest factors contributing to a slowdown were the low level of other labour compensation and relatively slow growth of social transfers. The latter nevertheless grew fastest of all receipts on average over the first eleven months of the year. Wage growth continued to slow at the end of the year despite the clear upturn in the economy. It was lowest in public services, and highest – around 5% in real terms – in the electricity, gas and water supply sector and in real estate.

December' wage figures are needed to be published in order to get a definitive picture of wage developments in the last quarter of 2003, as some companies paid end-of-year wage bonuses in November already.

Employment conditions at the end of the year were relatively subdued. The negative trend observed in 2002, which was already tailing off last summer, seems to have been reversed definitively and the economic upturn promises to deliver positive developments in employment.

Labour costs: average gross wages (Statistical Office of the Republic of Slovenia) + other labour compensation (Agency for Payments).

However, the upturn in the employment cycle is taking place rather slowly, as evidenced in particular by the negative year-on-year growth of small business employment in the last months. The employment outlook for the next few months is strong, although optimism

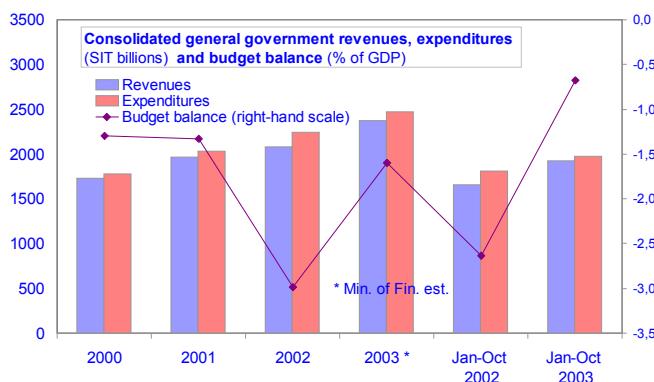

compared with twelve months ago expressed in business surveys has fallen off somewhat in recent months. Employment fell most heavily in the first eleven months of last year in labour-intensive sectors and also in some sectors that had grown fast in previous years, including financial intermediation. Employment grew only in real estate and strongly export-oriented sectors and in public administration.

The manufacturing sector saw a sharp moderation in labour costs at the end of the year. Accelerated growth in industrial production was the main factor of increased productivity. While total labour costs grew at a virtually constant rate of around 7% from midsummer onwards, growth in labour costs per unit of output slowed further to below 3%, the lowest rate of growth since the middle of 2000.

3. PUBLIC SECTOR

The general government deficit last year was about 1.5% of GDP and was similar to the estimate made at the time of adoption of the revised budget in June. The general government deficit stood at SIT 47 billion after the first ten months of the year and widened additionally in the

last two months of the year. The deficit for the year as a whole is estimated to be around 1.5% of GDP, which is similar to the estimate made at the time of the adoption of the revised budget in June.

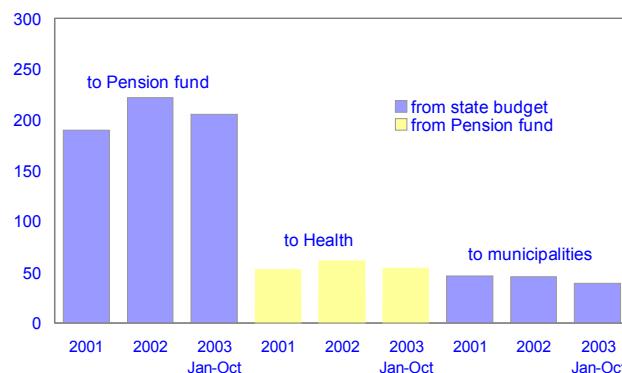

Revenues and expenditures were larger than planned. Success in maintaining the general government deficit at the level envisaged in the revised budget was made possible by favourable developments on the side of government revenues. They grew faster than expected, enabling larger than planned expenditures to be offset.

The largest deficit was shown in the state budget, but arised largely from the Pension fund. The Health fund was also in deficit. The state budget deficit over the first ten months of last year was SIT 58 billion and of Health fund SIT 13 billion. A total of SIT 219 billion of state budget funds was paid to the Pension fund, of which SIT 141 billion went to cover a deficit.

Part of the Pension fund's expenditures were in December covered by Kapitalska družba (KAD). In accordance with a government decree KAD paid SIT 6.4 billion to the Pension fund in December to cover its deficit.

Source: Ministry of Finance.

Revenues

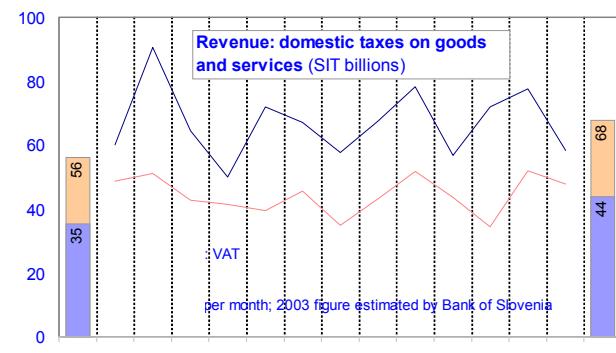

General government revenues grew by over 5% in real terms between January and October last year, although growth for the year as a whole was lower. The effect of the alignment of the budget year with the calendar year in 2002 is excluded from the calculation. Corporate income tax revenue grew most strongly in real terms in the first ten months of the year. Revenues from taxes on goods and services and non-tax revenues were also higher than anticipated.

Corporate income tax revenues grew last year by more than 40% in nominal terms. Corporate income tax revenues amounted to SIT 100 billion in the first eleven months and around SIT 107 billion in the year as a whole. Such large increase is largely attributable to changes in the law (such as a reduction in the rate of investment relief from 40% to 20% at the start of last year).

Revenues from taxes on wages grew by 3.8% in real terms between January and October. Revenues from personal income tax, taxes on payroll and workforce and social security contributions over the first ten months of the year were almost one-tenth higher than in the previous year. Social security contributions grew the least and taxes on payroll and workforce the most. Among the latter payroll taxes represent the majority and are increasing as a fraction of budget revenues. The tax threshold remains SIT 130,000 of gross earnings and the tax scale is also

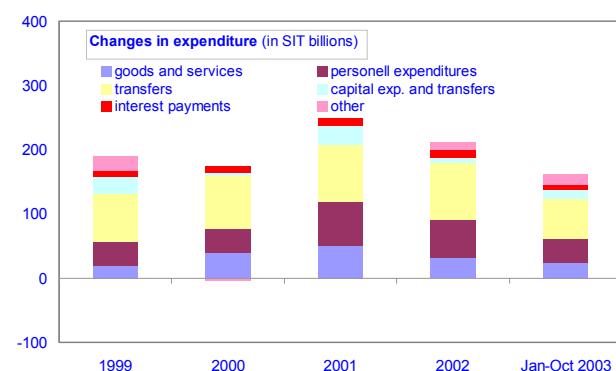

unchanged. With nominal wage growth, this leads to progressive taxation.

Consumption tax revenues grew by over 4% in real terms between January and October. Growth for the year as a whole is estimated to have been slightly lower than this, although full-year VAT and excise duty revenues were higher than expected at the time of adopting the revised budget for 2003. The highest growth was in excise duties collected on tobacco products, reflecting a rise in the rate of duty. The same is expected this year.

Expenditures

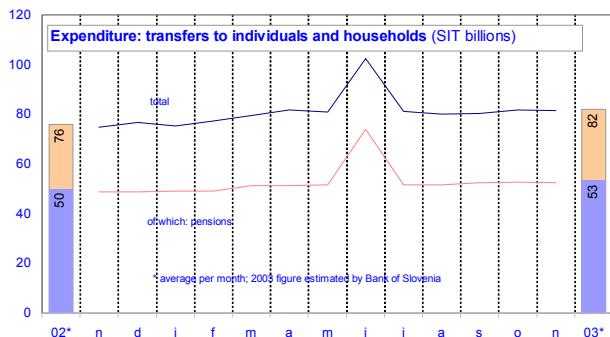

General government expenditure grew by 3.0% between January and October last year, and the rate of growth for the year as a whole was probably somewhat higher. General government expenditure last year is estimated to have been higher than expected at the time of adopting the revised state budget for 2003. The biggest differences are estimated in interest expenses, purchases of goods and services, and transfers. Investment spending was lower than expected. The fastest nominal growth was in expenditure on subsidies, interest payments, social security outlays and investment transfers.

Personnel expenditures grew by around 3% last year in real terms. Nominal personnel expenditure is estimated to have grown by around 9%. Wage adjustments increased expenditure by 5%, staff increases contributed a

further 2.6% and other sources (such as promotions and bonuses) accounted for just over 1.5%. Public sector wage expenditures are expected to grow more moderately over the next two years.

Expenditure on goods and services grew by 1.2% in real terms between January and October last year. Expenditure on goods and services last year is estimated to have been higher than envisaged by the revised budget. The government is planning restrained growth of such expenditure in its 2004 and 2005 budgets.

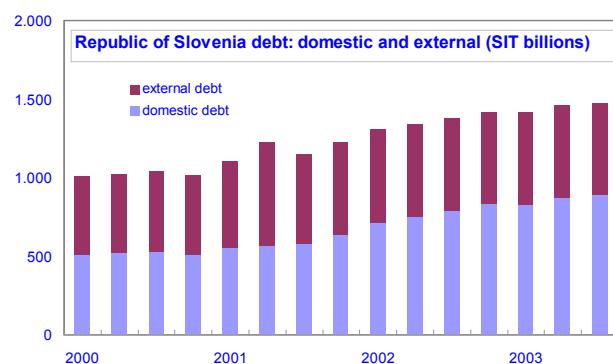

Transfers to households grew by 2.2% in real terms in the first ten months of the year. Social security allowances grew the most. Pensions and unemployment benefits were among the categories of transfers that grew less than average.

Expenditure on social security entitlements grew by more than pensions payments last year. Pensions payments grew by around 6.5% or 0.7% in real terms. Pensions were adjusted by 5.5% and the number of pensioners grew by 1.7%. The fastest growing group were those entitled to state and old age pensions.

Investment spending grew in real terms last year. Real growth came to around 5% over the first ten months. Investment transfers to private firms grew fastest.

Public debt

In 2003 up to September public debt guaranteed grew faster than public debt. Public debt in 2003 grew by 3.8% up to September and stood at around 26.5% of GDP.

Public debt guaranteed grew by almost 12% in the same period and were equivalent to over 7% of GDP.

Public finances in 2004

This year a general government deficit of 1.7% of GDP is planned. The government expects the general government deficit to reach SIT 107 billion. The budget documents envisage restrained expenditure growth (covering wage expenditures, social transfers and material costs), which will help maintain the deficit at roughly last year's level.

Achievement of the planned deficit is subject to certain risks. In December the government passed a Single Programming Document which serves as the basis for access to European Union funds. The biggest uncertainty surrounds the amount of revenue that will come from the EU budget. A portion is known in advance, but the larger part depends on the availability of projects suitable for EU financing. Moreover, these projects will require partial funding from the Slovenian state budget. Another source of risk is the timing and intensity of the economic recovery and the degree to which budget expenditures can successfully be restrained.

% of GDP	2000	2001	2002	2003	2004	2005

Source: Ministry of Finance Bulletin, Pre-Accession Economic Programm, August 2003, National Assembly Reporter, No. 83

The government determined state budget spending allocations for the first quarter. These total SIT 386.9 billion, over 10% more than in the first quarter of last year and represents 23.5% of the state budget for 2004.

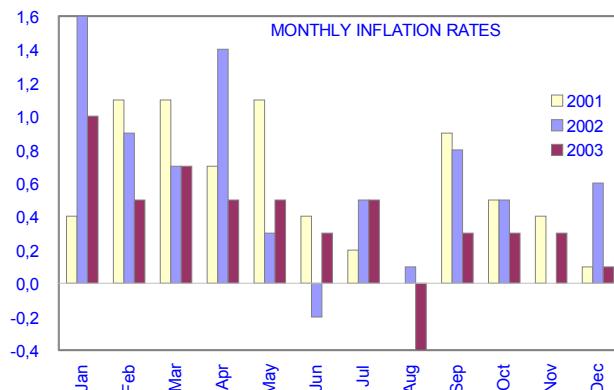

Social transfers will be adjusted upwards by 3.6% this year. Adjustment of social transfers will be based on the revised autumn inflation forecast for 2004, which was released in January. On this basis social transfers will be adjusted upwards by 3.6%.

Tax liabilities on cigarettes went up by 8.4% in January. A rise in excise duty on cigarettes is envisaged also for July, and the two increases are expected to bring SIT 9 billion in extra tax revenues if demand is unaffected.

Premiums of collective voluntary pension insurance for public employees will be paid by the end of April. Kapitalska družba (KAD) was chosen as the manager of the closed mutual pension fund for public sector employees. The government must pay the collective voluntary pension insurance premiums for public employees by the end of April, covering a period of eight months. Thereafter, premiums will be paid monthly. In April total premiums will be around SIT 8 billion.

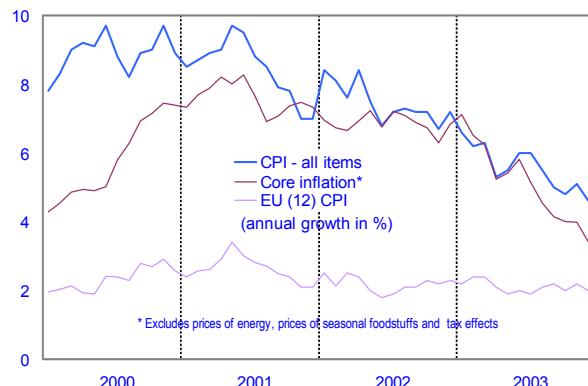

The budget deficit will again be financed mainly from domestic sources this year. Borrowing will be conducted in the domestic currency by means of nominal instruments with a fixed interest rate. In January the Ministry of Finance increased the quota for the issuance of one-month treasury bills from SIT 5 billion to SIT 6 billion. An issue of 10-year bonds is planned for this year, to take place on 15 March with a total value of SIT 80 billion.

4. PRICES

Year-on-year inflation in December fell to 4.6%. This means that price growth in 2003 was 2.6 percentage points lower than in 2002, when year-on-year inflation was 7.2%.

Monthly price growth in December was 0.1%, the second lowest monthly inflation in 2003. Goods prices fell on average by 0.2% while services prices rose by 0.8%. The relatively modest rise in consumer prices in December is largely attributable to widespread pre-New Year discounts.

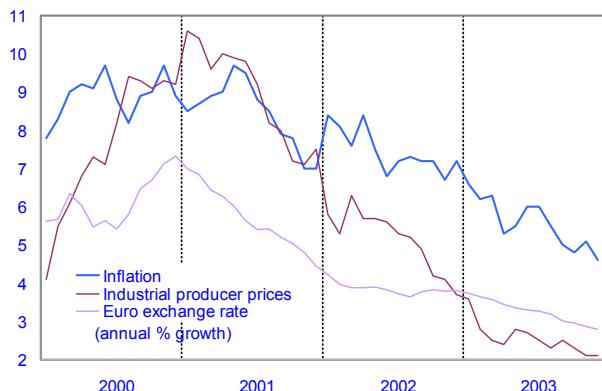

Growth of manufactured goods prices in the index of consumer prices in December was 4.1% year-on-year, down 1.5 percentage points on the previous month. December's fall was largely due to the New Year sales already mentioned, which pushed clothing and footwear prices on average down by 2.1% and communications by 1.1%. Motor cars prices also fell in December, by 0.3% on average. On the other hand, sports equipment prices grew by as much as 7.4% in the month, while the price of liquid fuels rose by 1.7%.

Twelve-month inflation of services prices rose from 6.1% in November to 6.5% in December. The rise in services prices is attributable to a number of substantial price increases, specifically in vehicle maintenance and repair (7.2%), package holidays (3.4%) and recreation and culture (2.6%). Vehicle maintenance and repair became dearer mainly because of a rise of as much as 32.5% in the price of technical inspections and of 3.4% in the price of automotive repairs. In recreation and culture, recreational and sporting services rose in price by 8.5% while admissions to cultural events went up by 2.5%. The price of overnight stays in hotels fell in December (by 3.2%), causing accommodation services overall to fall in price by 1.8%.

Sources: Statistical Office of the Republic of Slovenia. Breakdown of CPI by Bank of Slovenia and Institute of Macroeconomic Analysis and Development, other calculations by Bank of Slovenia. Figures may not sum to official figures due to rounding.

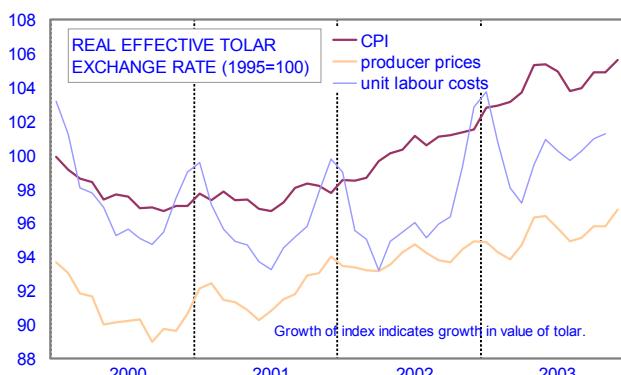

Core inflation in December fell below four per cent to 3.4%. As well as headline inflation, core inflation is falling. In December year-on-year core inflation was 0.6 percentage points lower than in November. We await both core and headline inflation to fall further in the next few months.

We expect to see a continued moderation of prices and further falls in inflation in the first few months of 2004.

Twelve-month industrial producer price inflation was the same in December as in November, namely 2.1% (compared with 3.7% in December 2002). Industrial producer prices were up by 0.5% in December compared with November. The largest growth (0.8%) was in intermediate goods, followed by consumption goods (0.3%) and capital goods (0.1%). Year-on-year, intermediate goods became dearer by 2.5% in 2003 and consumption goods by 2.4%, while capital goods became cheaper by 1.1%.

5. BALANCE OF PAYMENTS

Competitiveness

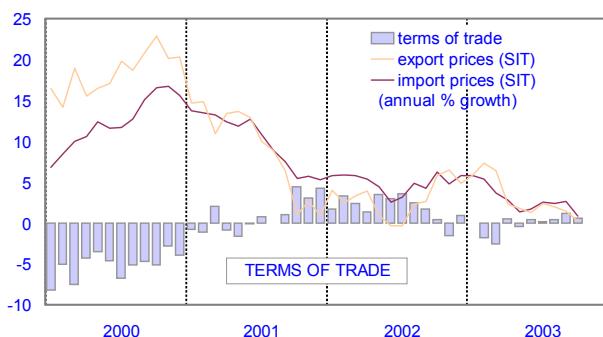

The real appreciation of the Slovenian tolar since 2000 was last year accompanied by nominal appreciation, as measured by the effective exchange rate. The growth in the nominal effective exchange rate of the tolar in 2003 was influenced by the slower rate of depreciation of the tolar against the euro and in particular by the decline in the value of the US dollar against major world currencies, especially the euro. The nominal effective exchange rate of the tolar grew by 0.6% in December and by somewhat over 1% in the last quarter of the year. Against a steady depreciation of the tolar against the euro at a rate of somewhat over 0.2% per month, the rise in the last quarter of the year was primarily due to the drop in value of the US dollar in October and December by 4.0% on average. Year-on-year growth of the nominal effective exchange rate was 0.8% in December, representing the rise in the strength of the tolar against a basket of foreign currencies over the previous twelve months. Over the same period the tolar

depreciated by 2.8% against the euro and appreciated by 14.7% against the US dollar.

The competitiveness of the Slovenian economy, measured in terms of the real effective exchange rate, weakened in December last year. In December the real effective exchange rate of the tolar was up by 0.8% on November and by 4.1% on the previous December on the basis of consumer prices, and by 1.2% and 2.0% respectively on the basis of producer prices.

On the other hand, a faster narrowing of the gap between the growth rates of domestic and foreign prices was a major factor preventing the erosion of competitiveness last year. For example, the difference in the index of Slovenian and foreign consumer prices narrowed from 5.5 percentage points in 2002 to 2.8 percentage points at the end of last year. Convergence is also evident in producer prices. Continued convergence of domestic and foreign prices would significantly mitigate the weakening of Slovenia's competitiveness on foreign markets in the future. External factors, particularly the sharp decline in value of the US dollar on world financial markets, were significant in the growth of the real effective exchange rate of the tolar compared with the previous year.

The terms of trade were rather unfavourable in the first half of last year but improved in the second half. Last year to November the terms of trade were on average unchanged from 2002. Export prices in the first eleven months of 2003 grew by 2.6% compared with 2002, as did imports.

The neutral aggregate impact of the terms of trade on the success of Slovenian business does not necessarily apply to all particular markets. This is because the impact of the terms of trade depends not just on achieved export and import prices per unit of goods but also on the overall currency mix of exports and imports in those markets and on exchange rate movements.

Competitiveness in the markets of the Russian Federation is improving. The predominant currency for transactions on both the export and import sides is the US dollar. On average over the last two years over 80% of exports and around 96% of imports have been conducted as US dollar transactions. Even given the slide in the US dollar against other world currencies, the 16 percentage point difference in favour of exports caused the purchasing power of a unit of Slovenian exports to the Russian market to increase by 7% in 2002 and by 5% in the first eleven months of 2003. The strong growth in economic activity and import demand in Russia and the growth in the purchasing power of a unit of Slovenian exports in the Russian market have been the main factors driving the expansion of goods trade with Russia over the past two years.

1) Effective exchange rate: basket of 7 currencies of Slovenia's main foreign trading partners (excluding Croatia), weighted by the shares in Slovenian goods trade. From January 2002 onward three currencies (EUR, USD, CHF) are used in the calculation. 2) Real exchange rate: SIT exchange rate divided by relative (domestic/foreign) price ratio.

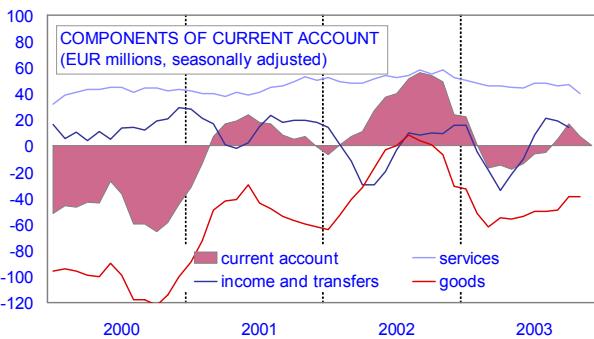

Current account of balance of payments

The improvement in the balance of payments on current account that had been observed since last May ceased after October. In November a deficit of EUR 27 million was recorded, while the cumulative surplus in the first eleven months of last year fell to EUR

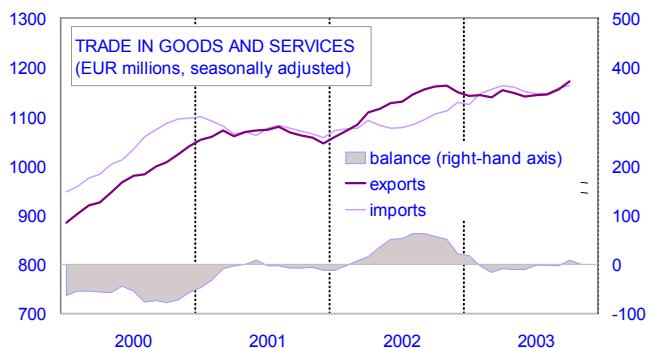

112 million or 0.5% of estimated GDP, equivalent to only 25% of the current account surplus recorded in the same period of 2002. We expect the final outcome for the current account of the balance of payments for 2003 to be close to balance because of the seasonal rise in imports in December.

Despite short-term fluctuations, the trend in goods and services remains favourable. Aggregate exports of goods and services grew by 0.2% and imports by 4.8% last November compared with the same month in 2002. November's growth in aggregate exports of goods and services was driven by year-on-year export growth of 3.2%, while exports of services shrank by as much as 13.7%. On the import side there was growth in both goods, by 3.6%, and services, by 6.7%. According to seasonally adjusted figures, exports grew faster than imports. The trend rate of growth of exports of goods and services in November last year was 5.0% per annum, outstripping the trend growth of imports of goods and services by somewhat over one percentage point.

Developments in the balance of payments in 2003 were influenced by both external and domestic factors. Reduced demand for Slovenian goods from within the EU (which is the destination for around 60% of Slovenia's total goods exports) was the main external factor causing a slowdown in goods exports in the first half of last year. With the upswing in economic activity in the second half of the year and the reorientation of exports to some previously neglected European and US markets, goods exports began to pick up.

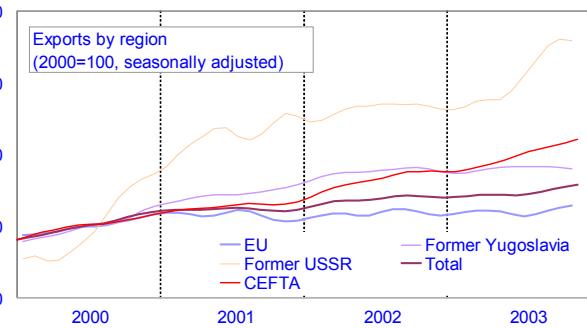

Another important external factor were movements in the terms of trade. In 2002 a 1.9% improvement in the terms of trade accounted for somewhat less than half of the balance of payments current account surplus. In the first eleven months of 2003 the terms of trade remained unchanged compared with the previous year and did not improve the current account balance. We expect the terms of trade of Slovenian exporters to improve gradually and once again exert a positive impact on the current account balance in 2004 due to the rapid fall in import prices since March 2003.

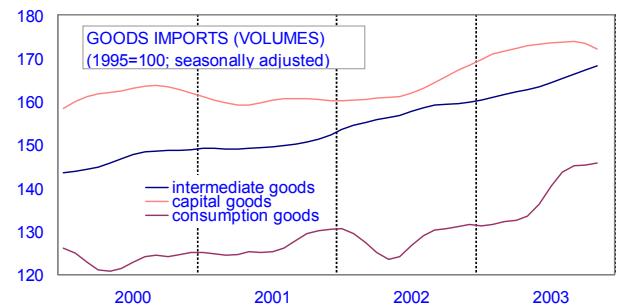

The main domestic factors affecting the balance of payments were the cyclical upturn in domestic demand and to some extent the reduction in nominal interest rates and slowing of the depreciation of the exchange rate. Both of these changes in domestic factors stimulated domestic demand. Domestic demand, both consumption and investment, increased imports of goods in particular.

Demand for Slovenian goods last year increased by more than average in some EU countries, the United States and Turkey. Goods exports last November were worth EUR 966 million, up 3.2% on a year before. Year-on-year growth in the first eleven months of the year was more modest, at 2.6%. Demand from the EU grew by a

mere 0.9%. Demand from Germany and the United Kingdom fell by around 5%, while the largest drop, of around 15%, was in demand from France. The decline in exports to these markets was offset by increases in demand of 6% from Austria, 12% from Italy and most of all 38% from Spain. Demand from the CEFTA countries and the Russian Federation grew roughly equally by around 8%, while demand from the countries of the former Yugoslavia remained at the same level as in 2002.

The largest increase in exports last year was a 52% rise in sales to the United States, primarily driven by increased exports of pharmaceuticals. Exports to Turkey also grew more than average, by 30%. In countries where the growth of Slovenian exports was highest, Luxembourg, Spain in Turkey, the strongest growth was in exports of motor vehicles, medicinal and chemical products, and metal products and power-generating machinery and equipment, and also, in the case of Turkey, clothing, i.e. products at a higher stage of processing. The later is confirmed by figures for the growth of exports according to purpose: exports of capital goods grew 8.5% year on year in October and 15.3% in November, while consumption goods grew by 6.6% and 5.3% respectively.

Year-on-year growth in goods imports in November last year only fractionally exceeded growth in goods exports. Imports were worth EUR 1,067 million, 3.6% more than in the same month of 2002, while there was a cumulative rise of 5.6% in the first eleven months of the year. In volume terms goods imports rose year-on-year by 6.1% last November, less than the average for the second quarter (6.3%) and third quarter (7.4%). The composition of imports by use saw slight rises of 3.5% in imports of intermediate goods and 4.5% in imports of capital goods. Imports of consumption goods continued to

grow fairly strongly, by 11.2%, linked to the strong growth in domestic consumption at the end of last year. Goods imports can be expected to continue to grow fairly strongly in year 2004. Besides domestic factors encouraging domestic consumption, the growth of imports of consumption goods is also likely to have been spurred by lower import prices. In the period from March to November last year import prices of consumption goods fell by 5.3%.

In the first eleven months of last year the surplus in trade in services fell by more than 15% year-on-year to EUR 501 million as a result of services imports growing faster than exports. In addition to adverse economic conditions on foreign markets, the deterioration in the balance of trade in services compared with 2003 was brought about by factors that had given rise to an above-average boost to revenues from certain services in 2002. For example, 2002 saw a strong rise in income from financial services due to a major influx of foreign direct investment into Slovenia at the end of the year, which was not repeated in 2003. Certain large-scale construction projects in the former Yugoslavia, linked to investment by domestic firms, were completed and settled. Income from intermediation services fell due to the slowdown in exports. Movements in services imports last year largely mirrored movements in goods imports, with transportation and services related to investment activity.

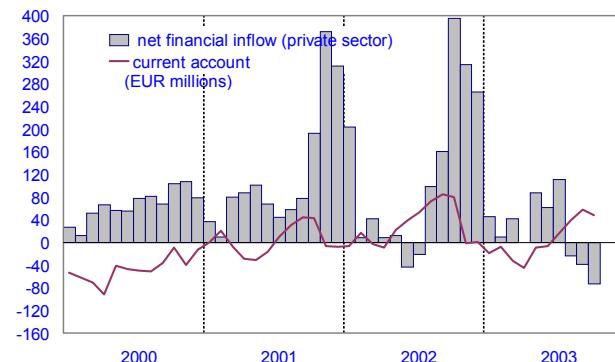

In the first eleven months of last year net compensation of employees and transfers fully covered the investment income deficit. The investment income deficit came to EUR 208 million, 30% less than in the corresponding period of 2002. The fall is mainly due to a change in the method of calculating reinvested earnings arising from foreign direct investments in Slovenia. Interest payments grew over the same period by 20% to EUR 133 million. The increase might have been greater in view of the growth in external debt, if interest rates on world financial markets had not also fallen last year. The smaller rise in net interest payments

was also aided by successful management of foreign currency reserves by the Bank of Slovenia.

Financial transactions with the rest of the world

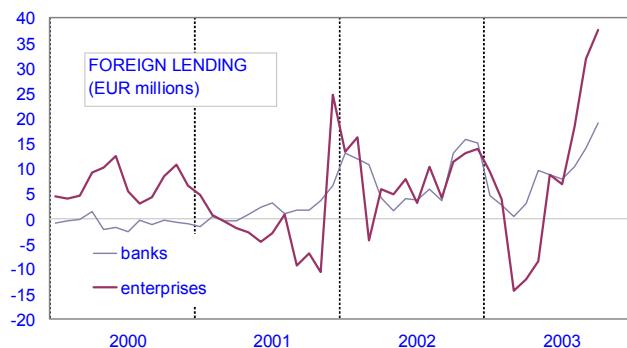

Two consecutive months of net outflows in financial transactions with the rest of the world were followed in November last year by a modest net inflow of EUR 9 million. In the first eleven months of the year net financial inflows totalled EUR 37 million or 0.2% of GDP. In the composition of flows, the share of equity investments rose on the assets side while on the liabilities side the opposite occurred, with the proportion of debt liabilities to the rest of the world growing.

Total claims on the rest of the world grew by EUR 1,430 billion in the first eleven months of 2003, somewhat less than the previous year. The increase in claims of somewhat over one-third stemmed from the growth of households' foreign currency, which has continued uninterruptedly since the introduction of the euro notes and coins. Equity capital investments were two and a half times greater than a year previously, while net trade credits to the rest of the world were down by one half.

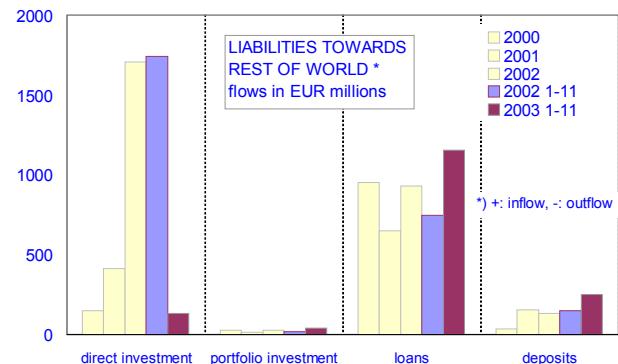

Net trade credits grew significantly more slowly than the previous year and amounted to EUR 276 million over the first eleven months. While the balance of payments figures do not distinguish the debit and credit side of net trade credits, statistics on external debt and foreign assets show that trade credits issued increased last year, while trade credits received actually declined due to net repayment.

One of the largest outflows in 2003, domestic direct investment abroad, was at its second lowest level in the first eleven months of the year in November after February, at only EUR 5 million. Such investment nevertheless totalled EUR 234 million up to November, three times more than in the corresponding period of 2002. Unlike inward foreign investment in Slovenia, which was predominantly in the form of debt investments, outward foreign investment last year was predominantly in the form of equity capital.

Having been subdued at the start of the year, private sector loans to the rest of the world grew strongly in the last three months. November's net outflow of loans worth EUR 35 million, while slightly down on the previous

two months, was still twice as high as the average monthly net flow in the previous year. Loans to the rest of the world were fairly evenly divided between banks and enterprises, which was also true of 2003 as a whole and the previous year.

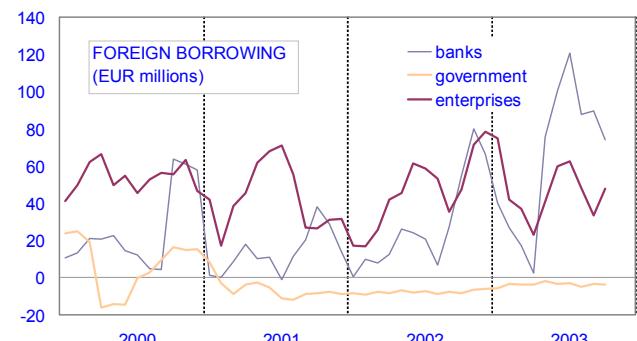

Total liabilities to the rest of the world last year grew significantly more slowly than in past years, especially due to a fall in inward direct investment. Foreign direct investment in fact grew by EUR 37 million in November, although the cumulative inflow was very modest. Even in November most of it consisted of debt flows from foreign investors to subsidiaries in Slovenia. Unlike direct investment, other liabilities to the rest of the world (mainly debt liabilities, constituting external debt) grew by substantially more than in 2002.

In November banks made net repayments of foreign debt, while enterprises significantly increased their net foreign borrowings. Inflows of foreign loans to banks in 2003 nevertheless totalled EUR 627 million up to the end of November. Enterprises took out an additional EUR 526 million in foreign borrowing. Gross external debt rose by more than EUR 1.1 billion in the first eleven months of last year on account of foreign borrowing alone.

Gross external debt stood at EUR 12,988 million in November, EUR 1,505 million more than at the end of 2002. The increase in the debt was primarily due to a rise in private sector indebtedness through foreign loans (which grew by almost EUR 1 billion) and growth in foreign indebtedness among affiliated enterprises (of EUR 323 million). Government reduced its external debt by EUR 76 million through net repayments of foreign

loans. The ratio of gross external debt to GDP rose by five percentage points from 49% to 54%.

Claims to the rest of the world grew by only EUR 545 million last year up to the end of November, reducing debt coverage by assets to 101% from 110% at the end of 2002. Coverage of short-term debt by remaining maturity of up to one year by foreign currency reserves, however, remains favourable. Foreign currency reserves stood at EUR 7,700 million at the end of December, 74% higher than the level of short-term external debt.

6. MONEY AND CREDIT

Growth of broad money was slow in November and halted altogether in December. M3 grew by SIT 15.3 billion (0.4%) in November and remained at the same level at the end of December. Year-on-year growth of

broad money has been falling since August and was 6.0% in November and 4.9% in December. The falling growth rates were largely due to the impact of privatisation and the consequently high base in the last quarter of 2002.

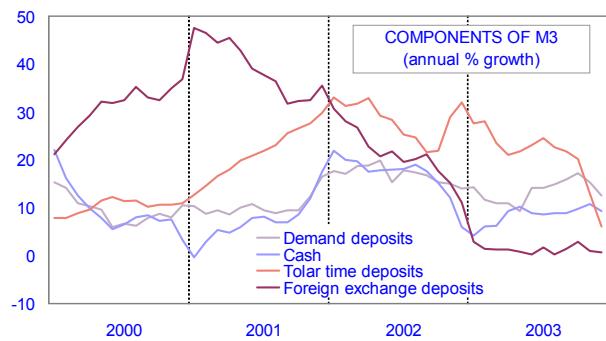

The main contributor to the growth of M3 in October and November were tolar time deposits, while in December the fall in tolar time deposits was equal to the increase in tolar demand deposits (a seasonal effect). Measured as monthly averages of daily data, tolar-denominated time deposits grew by SIT 40.8 billion in October and November, accounting for almost three-quarters of the growth of broad money. In December tolar-denominated demand deposits rose by SIT 24.6 billion while tolar-denominated time deposits fell by SIT 20.8 billion.

The fastest-growing tolar-denominated time deposits were deposits with a maturity of between one and three months, and long-term deposits. In the last quarter of the year time deposits of one to three months grew by SIT 44.5 billion (of which SIT 31.9 billion was in

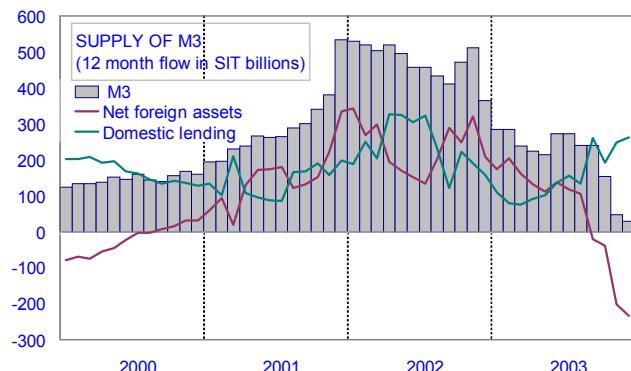

November) and long-term deposits grew by SIT 9.4 billion, while other time deposits decreased.

Growth in foreign currency deposits, which slowed in October and November, returned in December to its rate of previous months. Foreign exchange deposits rose by SIT 14.9 billion in December and on average by SIT 9.7 billion a month in the second half of last year. The somewhat faster growth of foreign currency deposits in the second half of last year was probably due to convergence of tolar interest rates with those of the euro area.

Growth of M1 was slow in the second half of last year and only began to increase in early December, reflecting seasonal effects. Measured in terms of the monthly average daily balance, M1 grew by SIT 28.8 billion in December to stand at SIT 796.7 billion and remained at that level in the first half of January. Year-on-year M1 growth in December was 10.6%.

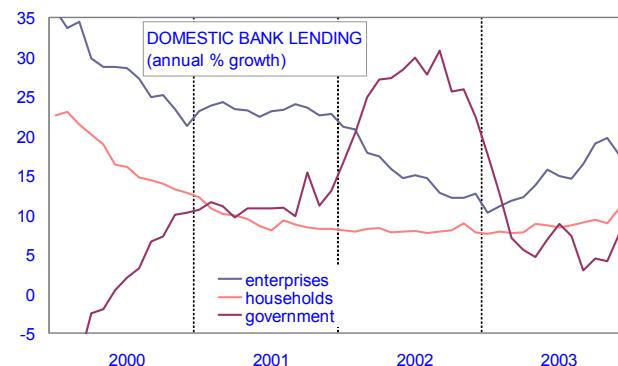

In 2003 M3 rose entirely on account of lending by domestic banks, as the contribution of balance of payments flows to M3 growth was negative. Annual

growth of M3 in 2003 was SIT 177.1 billion, with domestic bank loans increasing by SIT 384.2 billion. Net foreign assets, which reflect balance of payments flows and were an important component of M3 creation in 2002, fell in 2003 by SIT 181.1 billion.

Domestic bank lending in 2003 was up on the previous year, while its composition also shifted from government towards the enterprise sector. Bank lending began to pick up in the middle of the year, when year-on-year growth dipped to its lowest rate (10%). At the end of the year it had risen to 14%. Domestic bank lending in 2003 amounted to SIT 384.2 billion, SIT 131.6 billion of it in the last quarter, twice the amount in the same period of 2002.

Foreign currency loans remain an important part of the composition of domestic bank lending, although they are declining as a proportion. Foreign currency loans made up 50% of lending last year as a whole and 43% of lending in the last quarter. The proportion of foreign currency lending diminished, mainly because of an increased proportion of long-term tolar-denominated loans.

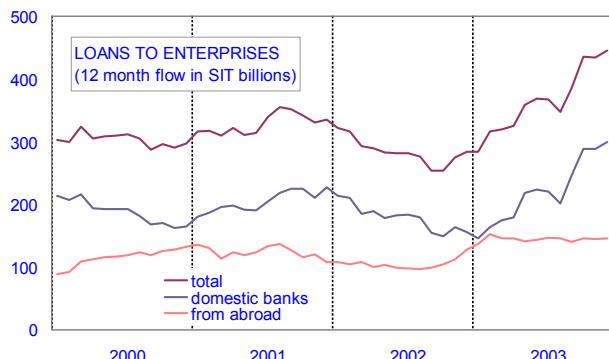

Foreign borrowing of enterprises was somewhat higher in 2003 than in 2002, although it fell as a proportion of total corporate borrowing. While foreign borrowing remains an important source of finance for enterprises, foreign borrowing fell as a proportion of total borrowing by enterprises in the first eleven months of the year from 56% to 37%. Foreign borrowing of enterprises

grew again in November, when firms raised 55% of all their borrowing abroad.

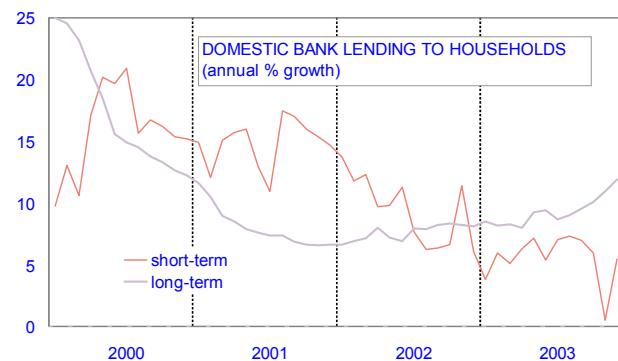

Domestic borrowing by enterprises rose steadily in 2003, although this trend weakened slightly in December. In 2003 enterprises borrowed SIT 237.3 billion from domestic banks, almost twice as much as in the previous year. The rate of borrowing was highest in the fourth (SIT 78.1 billion) and second (SIT 75.7 billion) quarter. Growth in domestic borrowing of enterprises rose to 18% year-on-year in the last quarter. The increase in

domestic borrowing by enterprises was also a sign of an upswing in economic activity.

In 2003 borrowing by enterprises was predominantly in the form of foreign currency loans, although the proportion of tolar-denominated borrowing rose compared with 2002. In 2003 enterprises borrowed SIT 67.0 billion in tolar-denominated and SIT 170.3 billion in foreign currency loans (compared with SIT 15.6 billion and SIT 108.0 billion respectively in 2002). Growth in foreign currency borrowing was more or less constant throughout the year at between 37% and 40% year-on-year. Growth of tolar-denominated borrowing accelerated, especially at the end of the year, when long-term tolar-denominated loans to enterprises grew at annual rates of between 11% and 14% while short-term tolar-denominated loans grew at rates between 4% and 8%.

Borrowing by households, especially long-term, grew in 2003, but only gradually. Year-on-year growth of household borrowing was 7.5% at the beginning of last year and 10.6% in December. Over the year as a whole households borrowed SIT 60.5 billion, roughly 50 per cent more as in 2002 and 2001, when the figure was around SIT 40 billion.

Borrowing by general government was relatively modest in 2003. The government borrowed SIT 47.3 billion from domestic banks last year, almost three times as much as in the previous year. It raised most of its debt by issuing securities, raising only SIT 16.3 billion in loans.

7. BANKING SECTOR

Growth of banks' total assets slowed throughout 2003 to a relatively modest 10.7% or only 6.1% in real terms at the end of the year. In 2002 banks' growth was almost seven percentage points higher, albeit in the context of somewhat higher inflation (7.2%). Because of the slowdown in the growth of banks' total assets, financial intermediation by banks again remained below 90% of GDP.

Growth in banking activity differed according to banks' size. Small banks recorded the highest growth in banking activity, of 22.5%, while medium-sized banks recorded somewhat lower growth of 15.6% and large banks the lowest growth of only 6.2%. The low growth of the large banks in 2003 was due to strong financial inflows into banks in the last quarter of 2002. Despite their rather wide variation, growth rates were

nevertheless more uniform than in 2002, when small banks grew the least in terms of volume of transactions.

The market shares of individual size categories of banks did not change significantly in 2003. The market share of large banks shrank from 54.8% to 52.2%, that of medium-sized banks grew by 1.0 percentage point to 30.6% while that of small banks grew by 1.6 percentage points to 17.2%.

On the assets side of the balance sheet, the fastest growing items were capital investments and loans to non-banks, although the growth rates of these investments were only slightly higher than in 2002. Loans to non-banks grew by 15.3% in 2003 and outstripped growth in banks' investments in securities by four percentage points. Growth rates of lending activity nevertheless remained among the lowest in the last eight years. Lending of small banks grew the most, by 22% per annum, while the difference in the growth in lending of medium-sized and large banks was less than the difference in the growth of total assets.

Growth of investments in securities fell sharply in 2003 compared with 2002. This was the effect of smaller foreign exchange inflows than in 2002 and a correspondingly reduced need for sterilisation. Investments in securities among the large banks grew by

only 5.3%, which was as expected given the large stock of subscribed securities at the end of 2002. Among small banks, investments in securities rose by somewhat more than 25%, in step with the growth of lending activity of these banks. The composition of investments among small banks was thereby left substantially unchanged; in other words, secondary liquidity of these banks remained at a similar level as in 2002. The group of medium-sized banks recorded a higher rate of growth of total assets than the large banks, primarily due to higher growth of investments in securities and capital investments.

On the liabilities side, 2003 saw only modest growth in non-bank deposits. Deposits by non-banks grew by a mere 4.5%, less than annual inflation. Banks made up for modest growth of deposits with more active borrowing on the interbank market, especially abroad, as the rate of growth of interbank financing neared 40%. Banks furthermore made more extensive use of the possibility of financing their investments through issuance of securities, year-on-year growth of which was 22.6% in December 2003. Among sources of finance mention should be made of a strong rise in subordinated debt of 40.2%, with which banks ensured the required level of capital adequacy. Banks' total capital last year increased by only SIT 7.3 billion, significantly less than in previous years, when compulsory inflation-indexed revaluation of capital was part of required accounting practice.

The structure of the banking sector balance sheet was affected by differences in the growth of the various items. Loans to non-banks rose by less than two percentage points as a proportion of total assets despite rather higher growth rates than in 2002. The share of securities in banks' total assets, having risen strongly in 2002, rose further last year due mainly to a decline in the share of compulsory reserves and loans to banks.

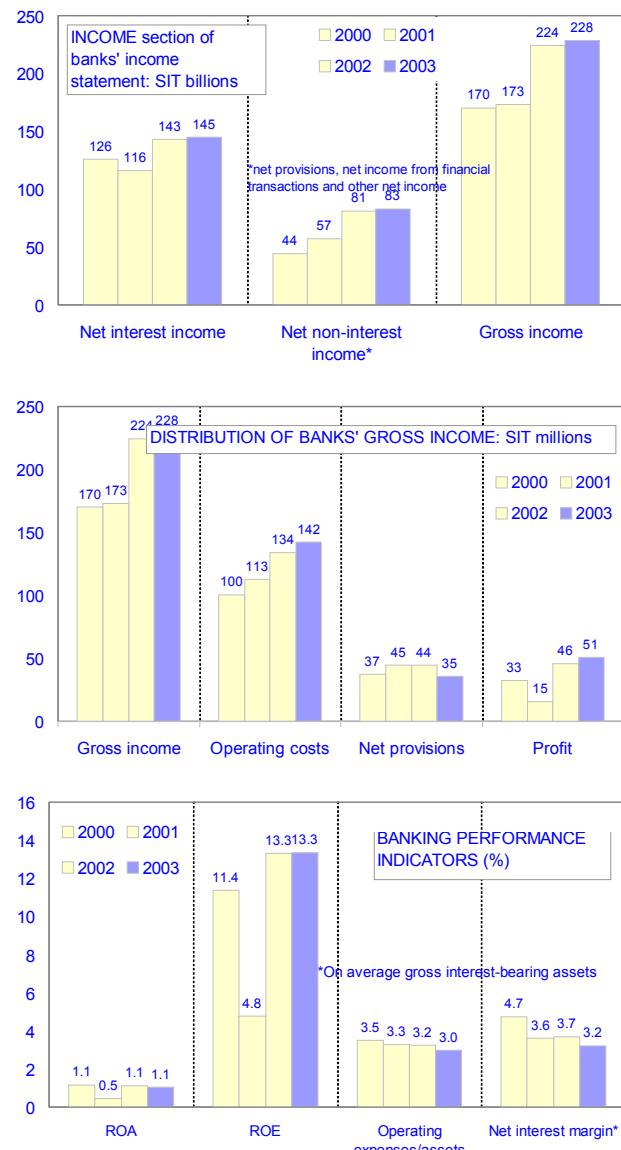

Because of the ongoing lowering of nominal interest rates, banks managed to record only the same nominal net interest income as in 2002. Banks' net interest income grew by only 1.2%. Gross income grew by a little more, but only by a modest 1.7% compared with 2002. Within gross income, operating expenses grew by 6.1%, within which labour costs grew by 8.4% and depreciation costs by 11.9%. In order for banks

nevertheless to increase their profits compared with 2002 by SIT 4.7 billion or 10.3%, they had to reduce provisioning costs by 20.2%. Banks managed to make only SIT 35.5 billion in provisions, compared with SIT 44.5 billion the previous year. The ratio of provisions to gross income fell to only 15.5%, its lowest since 1998.

INCOME STATEMENT	<u>2003</u>				y.o.y. growth
	2001	2002	Jan-Dec.	growth	
Interest income	298.2	344.1	330.2	-4.1	
Interest expense	182.3	200.7	185.0	-7.8	
Net interest income	115.9	143.4	145.2	1.2	
Non-interest income	57.2	81.0	83.0	2.6	
Gross income	173.2	224.4	228.2	1.7	
Operating costs	112.9	133.9	142.0	6.1

Profit before tax	15.4	46.0	50.7	10.3	
Taxes	13.5	16.5	
Profit after tax	1.9	29.5	

Adverse developments in the structure of banks' balance sheets and reductions in interest rates led to a continued squeezing of banks' net interest margin. The interest margin, measured in proportion to total assets, fell from 3.4% at the end of 2002 to 3.0% at the end of last year, while the non-interest margin fell to 1.7% and the financial intermediation margin fell below 5% for the first time to 4.8%.

8. EXCHANGE RATE

The average euro exchange rate rose in December by 0.5 tolars compared with November to stand at SIT 236.6 per euro. The monthly growth rate was not significantly different from November's, at an annualised

2.5%. Year-on-year growth, however, continued to fall, and fell by one percentage point over the year. The tolar depreciated against the euro by 2.8% on average last year, compared with 3.8% the year before.

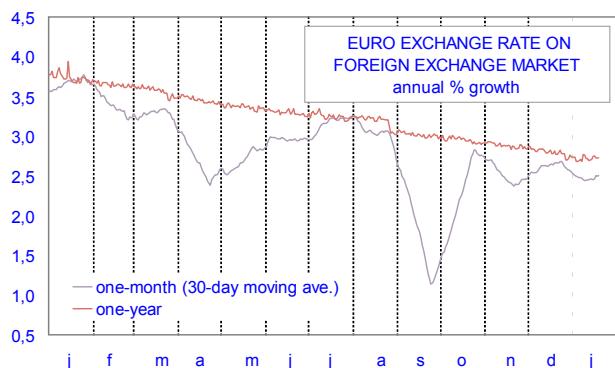

The Bank of Slovenia continues to slow the growth of the exchange rate in line with its policy of gradual nominal interest rate adjustment. At the start of January the Bank of Slovenia cut all its interest rates. At the same time, by means of a further short-term intervention it reduced the current rate of growth of the euro exchange rate by 0.25 percentage points, from 2.5% to 2.25%, in order to maintain uncovered interest parity. Interest rates are nevertheless at an adequate real level given low inflation forecasts. In the final months of last year inflows of foreign currency slowed, with the result

Sources: BoS, Statistical Office of the Republic of Slovenia and various foreign sources.

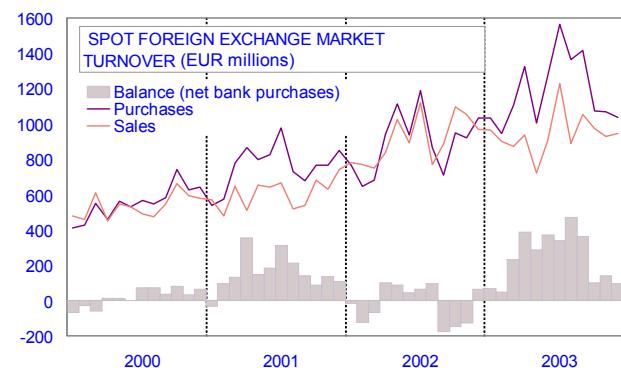

that additional closure of uncovered interest parity was unnecessary.

The spot, forward, and exchange office foreign exchange markets overall showed a slight excess demand for foreign exchange in December, as in October and November. Excess demand totalled SIT 2.4 billion out of total turnover of SIT 564.3 billion. The largest net demand, SIT 10.7 billion, was for foreign currency at exchange offices, while net demand for foreign exchange from enterprises was worth SIT 6.8 billion. The supply side was filled by non-residents, who supplied SIT 16.3 billion net in foreign exchange.

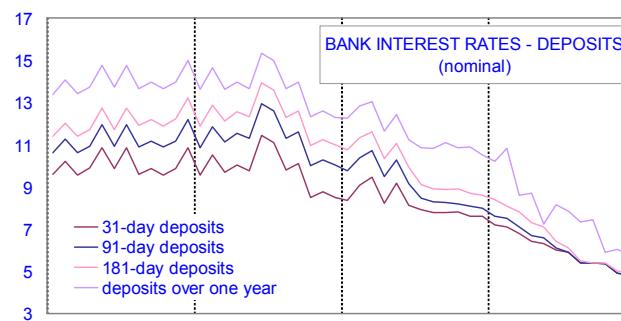

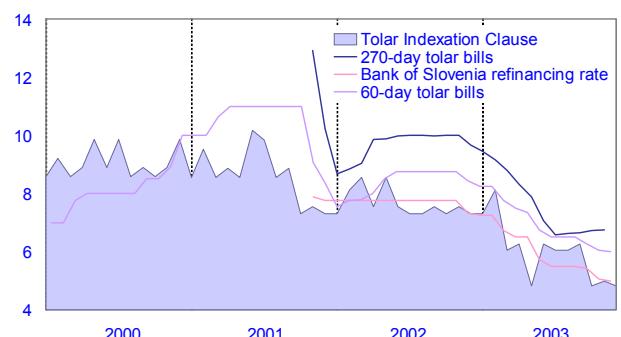

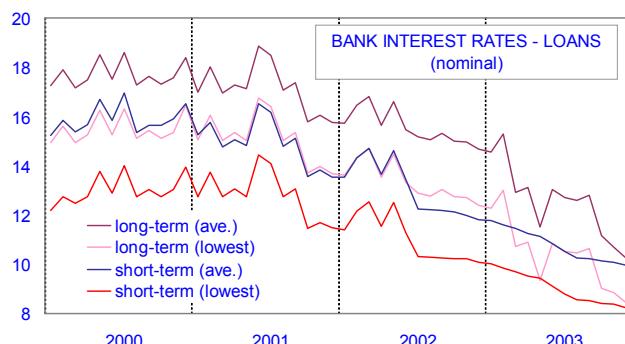

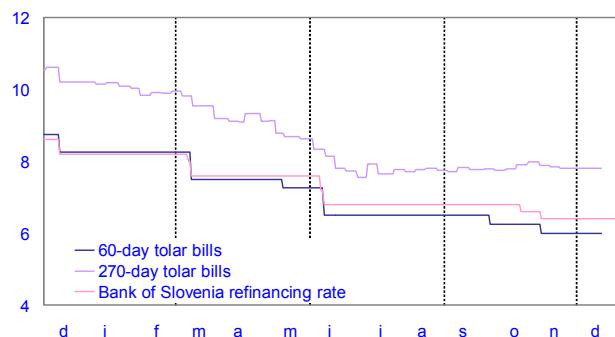

The exchange office and spot foreign exchange markets were dominated in December by seasonal factors. Pre-New Year shopping, travel and New Year foreign tourism deals raised net demand for foreign currency on the high street by SIT 4.7 billion. Likewise,

settlement of accounts, repatriation of profits to foreign countries and the falling due of payments at year-end increased net demand for foreign exchange from enterprises on the spot foreign exchange market by around SIT 6 billion.

In early January non-residents again increased foreign currency inflows. In the first half January alone non-residents supplied SIT 51.6 billion net of foreign exchange to the spot foreign exchange market, of which they purchased SIT 32.2 billion net on the forward foreign exchange market. The remainder was absorbed by enterprises, who purchased SIT 8.3 billion, and exchange offices, who sold SIT 5.7 billion net foreign currency. There was about SIT 5 billion in excess supply.

9. INTEREST RATES

At its first regular meeting of 2004 the Governing Board of the Bank of Slovenia cut interest rates on its instruments by 0.25 percentage points. The rate cut preserves the level of real interest rates and makes possible the gradual achievement of the Maastricht criteria. On the assets side, the interest rate for lombard loans is now 7%. On the liabilities side, the interest rate on 60-day tolar bills is at 5.75% and that on 270-day tolar bills is at 6.5%. The price of Bank of Slovenia foreign exchange buy-sell swaps is 2.75%, while that of foreign exchange sell-buy swaps is 1.25%.

Interest rates on the interbank market fell below 5% at the end of December. The average rate during December was 4.69%, 0.27 percentage points lower than in November. In the first half of January it varied between 5.0% and 5.6%.

The curve of the time structure of SITIBOR interest rates was lower in December than in November. The fall was greater at shorter maturities, while at longer maturities it remained at a similar level as in the previous month.

At auctions of 270-day tolar bills the average auction interest rate in December and at the start of January varied between 6.55% and 5.92%. The Bank of Slovenia adapted its quotas to market conditions. Demand exceeded supply throughout, with the exception of the final auction in December, when the Bank of Slovenia raised the quota to SIT 28 billion.

Interest rates on treasury bills varied between 5% and 5.5% in December and the start of January. Demand at auctions of one-month treasury bills exceeded supply in all recent months. This was also true of three-month, six-

month and twelve-month treasury bills. At auctions at the end of November and in December the average auction interest rate hovered above 5%, specifically 5.11% for three-month treasury bills (23 December), 5.12% for six-month bills (23 December) and 5.10% for twelve-month bills (25 November).

Bank interest rates fell again in December. On the assets side, the biggest fall, as in November, was in interest rates on long-term loans to households. On the liabilities side, interest rates on long-term deposits fell the most. On the lending side, nominal interest rates on long-term loans to households fell by 0.4 percentage points. In December the interest rate on these loans was 10.3%, 5.36 percentage points higher than in the European Union. Nominal interest rates on consumer loans fell by 0.1 percentage points. This interest rate is 2.16 percentage points higher than in the European Union. Interest rates on home construction loans were reduced by 0.2 percentage points while those on short-term loans to households fell by 0.1 percentage points. On the borrowing side, nominal interest rates on deposits with a maturity over one year came down again in December, falling by between 0.1 and 0.3 percentage points and varying between 5.4% and 6.1%, depending on maturity. Nominal interest rates on deposits with a maturity less than one year also fell in December by 0.1 percentage points. The interest rate on foreign currency demand deposits fell by 0.1 percentage points, as did the interest rate on foreign currency time deposits with a maturity over one year.

The monthly Tolar Indexation Clause rate fell in January to 0.3%. In February the monthly Tolar Indexation Clause rate will stay at the same level, as it will be calculated on the basis of figures for the growth of consumer prices available up to the end of January.

IV. NOTES ON METHODOLOGY

General Notes

Sectors

External sector consists of non-residents.

Residents of the Republic of Slovenia are defined as:

- companies and other legal entities with a registered office in the Republic of Slovenia, except their branches abroad;
- branches of foreign companies entered in the Companies Register of the Republic of Slovenia;
- sole proprietors or natural persons, independently performing business activities as their prime occupation, with a registered office in the Republic of Slovenia or having permanent residence in the Republic of Slovenia;
- natural persons with permanent residence in the Republic of Slovenia;
- natural persons temporarily residing in the Republic of Slovenia holding a residential or working visa valid for no less than six months;
- diplomatic, consular and other representative offices of the Republic of Slovenia abroad financed from the Budget as well as Slovene citizens employed at these representative offices and their family members.

All other persons and entities shall be deemed non-residents.

Domestic sector is broken down to monetary and non-monetary sector.

Monetary sector consists of the Bank of Slovenia and commercial banks. Commercial banks (hereinafter "banks") are deposit money banks that accept sight deposits and have banking licenses granted by the Bank of Slovenia. Only domestic banks, owned by residents or non-residents, are included.

Non-monetary Sector is further divided into following sub-sectors: Non-monetary financial institutions, General Government, Individuals, Enterprises and Non-profit institutions.

Non-monetary financial institutions include Savings banks, Co-operatives and other financial institutions.

General Government comprises Central Government and Other General Government. **Central Government** mainly consists of the Budget. **Other General Government** contains local communities and entities established by General Government - institutions, funds, companies, clubs and other societies engaged in education, health, culture, social insurance, trade unions and other organizations.

Households (Individuals) include resident individuals.

Enterprises comprise firms in private or public ownership or control, except for those included in the General Government.

Non-profit institutions consist of all entities, not included in any other sector.

Characteristics of the data

Data present stocks on assets and liabilities at the end of the period.

Data on stocks nominated in foreign currencies are converted into Tolars using Bank of Slovenia end of period middle exchange rate.

Data in tables are not seasonally adjusted.

Seasonal Adjustment

Graphs denoted (seasonally adjusted) present trend/cycle components of time series. Up to the June/July 2003 issue of the Bulletin, the sole technique for seasonal adjustment was X11-Impulse Trend, based on the Census X11. From the August 2003 issue on, the ARIMA based method Tramo/Seats is in use for some time series as well. The transition to the sole use of Tramo/Seats, which is recommended by the Eurostat and the ECB, is in progress.

The methods used:

Graph 1.1: X11 – Impulse Trend.

Graph 1.2: X11 – Impulse Trend.

Graphs 4.1, 4.2, 4.3: up to and including the June/July 2003 issue of the Bulletin, X11 – Impulse Trend, source Tabele 1.1. From August 2003 on, Tramo/Seats, source Table 1.2.

Table: Republic of Slovenia: general information

Table shows basic general data on Slovenia and its economy. In the "latest actual" column the latest available data for the current year are published. Data sources for the table are Bank of Slovenia, Ministry of Finance and The Statistical Office of the Republic of Slovenia.

1. MONEY AND BANKS

Last published data are preliminary.

Sectorization of banks' data as from April 30, 1999

For data from April 30, 1999 on a new sectorization has been implemented according to ***Regulation on Introduction and Implementation of Standard Classification of Institutional Sectors***, (hereinafter "SKIS") - Official Gazette 56/98. SKIS which implemented a national standard for economic sectorization is based on European System of Accounts 95 and is in accordance with System of National Accounts 93. According to SKIS the sectors of the economy are: 1.) Non-financial corporations, 2.) Financial corporations (central bank, commercial banks, other financial institutions), 3.) General government, 4.) Households, 5.) Non-profit institutions serving households and 6.) External Sector (non-residents). There has been no change regarding definition of *Non-resident*.

Domestic sector is broken down to monetary sector and non-monetary sectors.

Monetary sector consists of the Bank of Slovenia and commercial banks. Commercial banks (hereinafter "banks") are deposit money banks that accept sight deposits and have banking licenses granted by the Bank of Slovenia. Domestic banks, owned by residents or non-residents, are included.

Non-monetary Sectors are: Non-financial corporations, Non-monetary financial institutions, General government, Households, Non-profit institutions serving households.

Non-financial corporations are legal persons - market producers of goods and non-financial services.

Non-monetary financial institutions consist of: Savings banks, Co-operatives and *Other financial institutions*. *Other financial institutions* are: 1. Other financial intermediaries, except insurance corporations and pension funds (mutual funds, investment funds and financial leasing comp.), 2. Financial auxiliaries (securities brokers, stock exchanges) and 3. Insurance corporations and pension funds.

General government consists of: 1. Central government (administrative departments of state and central government agencies), 2. Local government (local administration, local agencies) and 3. Social security funds.

Households: resident individuals as consumers and resident individuals as sole proprietorships and partnerships being market producers and having no independent legal status. The data of the latter have been prior to April 30, 1999 included in the sector Enterprises.

Non-profit institutions serving households are clubs, political parties, trade unions, churches or religious societies, humanitarian and charity organizations, professional societies.

Table 1.1.: Monetary Aggregates

Table 1.1 shows stock data at the end of month for base money, monetary aggregates M1, M2 and M3, calculated according to the national definition and according to the harmonised definition of the European Central Bank (hereinafter: ECB).

The definition of base money is define as the sum of: *Banknotes in circulation, Banks' settlement accounts, Overnight deposit and Other deposits at the Bank of Slovenia* (Savings banks' settlement accounts, Savings banks' and Savings and loan undertakings' reserve accounts, transactional accounts of the Central and Local Government).

Data sources are banks' and Bank of Slovenia's bookeeping data, which refer to the end of the month.

Calculation of monetary aggregates according to the national definition is shown on the liabilities' side of Table 1.2: Monetary Survey – Consolidated Balance Sheet of the Monetary System (See methodological notes referring to Table 1.2).

Harmonised monetary aggregates for Slovenia are calculated according to ECB's definition of harmonised monetary aggregates of euro area, which is evident from documents published on web pages of the ECB (<http://www.ecb.int>). Main differences between the two definitions of monetary aggregates are as follows:

- limited maturity of items included (harmonised aggregates include liabilities of up to 2 years only),
- equal treatment of the foreign exchange liabilities (which are, in harmonised aggregates, included into adequate items together with those in domestic currency),
- status of the monetary neutral sector (the central government in the harmonised aggregates has the status of a monetary neutral sector) and
- inclusion of the money market fund shares / units into M3.

Composition of harmonised monetary aggregates, as defined by the ECB is:

- HM1 contains *currency in circulation and overnight (sight) deposits*.
- HM2 includes beside HM1 also *deposits with agreed maturity of up to 2 years and deposits redeemable at notice of up to 3 months*.
- HM3 includes *HM2, repurchase agreements and debt securities with a maturity of up to 2 years. Money market fund shares / units financial instrument*, which is according to ECB's definition also part of HM3, will be included in calculation when such institutions appear in Slovenia.

HM2 and HM3 are, for the period prior to July 2002, partly calculated as estimation, because of the unavailability of relevant bookkeeping breakdowns.

Table 1.2.: Monetary Survey - Consolidated Balance Sheet of the Monetary System

Table 1.2 shows consolidated balance sheet of all banks' and Bank of Slovenia at the end of the month. Data for banks are aggregated.

Domestic assets consist of banks' and Bank of Slovenia's claims on General Government arising from succession to the former SFR Yugoslavia and the bank rehabilitation program, and claims from loans and securities on other non-monetary sectors. Claims from succession and the bank rehabilitation program represent: claims of the Bank of Slovenia on the Succession Fund of the Republic of Slovenia (on account of the former National Bank of Yugoslavia Dinar cash), counterpart claims for Bank of Slovenia liabilities to the International Monetary Fund, government guaranteed bank rehabilitation bonds, government bonds for unpaid foreign currency deposits and claims on the former National Bank of Yugoslavia for foreign currency deposits.

Other assets include fixed assets of banks and of the Bank of Slovenia and some other items (doubtful claims, etc.).

In September 2003, the liability part of the Table changed due to methodological changes in the calculation of monetary aggregates under the national definition, because of gradual harmonisation with the definitions of the European Central Bank (changes were made to all time series).

To aggregate M1, a vista Savings deposits at banks were added, and therefore, it consists of currency in circulation and demand deposits at banks (including a vista Savings deposits) as well as at the Bank of Slovenia.

To aggregate M2, Tolar restricted deposits and securities in Tolar including subordinated debt were added, so that the aggregate consists in addition to M1 also of Tolar time deposits at banks, and Government time deposits at the Bank of Slovenia and of Tolar securities.

To aggregate M3, other foreign currency liabilities to central government and securities in foreign currency were added, so that M3 consists of M2 and foreign currency deposits and securities at banks.

Other liabilities consist of capital and reserves of banks and of the Bank of Slovenia and also include some other items.

In the Table as from April 30, 1999 in conformity with SKIS, items of assets and liabilities to other general government mean assets and liabilities to both Local Government and Social Security Funds. By analogy, enterprises mean non-financial corporations and non-profit institutions serving households, and individuals mean households.

From July 31, 1996 onwards, the data for Komercialna banka Triglav are no longer included in banks' data due to its bankruptcy.

Foreign assets/Bank of Slovenia and *Foreign assets/Deposit money banks* were changed because of changes in Tables 1.3. and 1.4. for the period from April 2000 onwards.

Table 1.3.: Balance Sheet of the Bank of Slovenia

The Table shows the Bank of Slovenia's assets and liabilities at the end of month.

Foreign Assets consist of: foreign currency, deposits abroad (sight and time deposits, from April 2000 on also foreign exchange deposits held by BS on the basis of repurchase agreements) first class securities of foreign issuers, monetary gold, reserve position and SDR holdings at the International Monetary Fund and other claims. *Other claims* mainly include balances on fiduciary accounts and with international financial organization.

Because of consolidation of statistical and bookkeeping records in February 2003, *International monetary reserves* are not presented as subitem of Foreign assets. International monetary reserves are shown in Tables 3.8. and 1.9..

Claims on General Government consist mainly of net claims on the National Bank of Yugoslavia taken

over by the Succession Fund of the Republic of Slovenia. Claims on the state budget, which are the counterpart of the succeeded liabilities to the International Monetary Fund, are also included.

Repurchase agreements include loans extended to banks based on securities and foreign currency (currency swap). From April 2000 on the amount of the foreign currency swap is shown as a part of the foreign assets of the Central Bank, because of the gradual permanent purchase of foreign currency from the part of Central Bank. In accordance to this are claims based on currency swap with domestic banks shown for the period up to March 2000 in the item *Repurchase* and thereupon in the item *Deposits*.

Other claims include some Bank of Slovenia's small deposits with banks and advance payments to the banks for repayments of Bank of Slovenia bills sold to other buyers through banks as agents.

General Government Deposits comprise deposits of Central Government budget.

Restricted deposits mainly result from deposits earmarked for import payments and deposits covering letters of credit, guarantees and credits taken abroad.

Money transfers in transit comprise money in transit.

Table 1.4.: Balance Sheet of Deposit Money Banks

The Table summarizes data on assets and liabilities of banks at the end of the month.

Demand deposits comprise giro accounts of enterprises and non-profit institutions, General Government, non-monetary financial institutions and giro and current accounts of households (see Table 1.6.).

Savings deposits include short and long-term tolar savings deposits of households (see Table 1.6.).

Time deposits consist of short and long-term time deposits of households, General Government, non-monetary financial institutions, enterprises and non-profit institutions (see Table 1.6.).

Restricted deposits represent deposits of enterprises and non-profit institutions, General Government and individuals to be used for money transfers to foreign countries or in cover of letters of credit, loans taken abroad or euro-checks, and can also be used for foreign currency exchange office transactions.

Note 1: In June 1996 foreign liabilities of banks for the undue foreign debt of former SFR Yugoslavia in the amount of SIT 49,027 million were taken over by the Government. Liabilities of banks to the Government were increased for the same amount. The banks decreased their foreign liabilities and claims on the Government for the part of matured allocated debt which they had been repaying to the government fiduciary account since January 1994 totalling SIT 18,078 million.

Bank of Slovenia's claims on and liabilities to banks are equal to the corresponding items in the banks' aggregated balance sheet with few exceptions: Item 'Reserves' (Giro and reserves accounts) on the assets side of banks' balance sheet is almost the same as item 'Deposits of banks' (Giro and reserves accounts, foreign currency deposits) on the liabilities' side of the Bank of Slovenia's balance sheet (Table 1.3.). Similar applies to items 'Liabilities to the banking system' arising from the Bank of Slovenia loans and 'Claims on domestic banks' based on loans in the Bank of Slovenia balance sheet (Table 1.3.). Discrepancies result from differences in accounting accuracy.

In February 2003 were items *Currency and Deposits* and *Loans from BS* diminished by the amount - claim i.e. liabilities based on currency swap of central banks with domestic banks, for period from April 2000 on. (More in Methodological notes for Table 1.3. - *Repurchase*). Total assets i.e. total liabilities were diminished accordingly.

Claims on and liabilities to domestic non-monetary sectors are shown in detail in Tables 1.5. and 1.6. Foreign assets and foreign liabilities are shown in detail in Tables 1.7. and 1.8.

Table 1.5.: Deposit Money Banks' Claims on Domestic Non-monetary Sector

The Table shows banks' claims resulting from loans and securities classified by domestic non-monetary sectors, which are also represented in Table 1.4. in item 'Claims on non-monetary sectors - Total'.

As from April 30, 1999 SKIS has been implemented in the sectorial distribution of the economy and therefore:

- the sector *Enterprises and non-profit institutions* comprises the data on SKIS Sectors *Non-financial corporations* and *Non-profit institutions serving households*;
- the sector *Central government* comprises the data on SKIS subsector *Central government*;
- the sector *Other general government* comprises the data on SKIS subsectors *Local government* and *Social security funds*;
- the sector *Individuals* comprises the data on SKIS sector *Households*;
- the sector *Non-monetary financial institutions* comprises the data on *Savings banks* and *Savings cooperatives* as well as the data on SKIS sector *Other financial institutions*.

Marketable securities are long or short-term securities acquired and held by a bank with the intention of reselling them in the short term.

Investment securities are long or short-term securities acquired and held for yield or capital growth purposes and are usually held to maturity.

Table 1.6.: Deposit Money Banks' Liabilities to Domestic Non-monetary Sector

The Table shows banks' liabilities from deposits of domestic non-monetary sectors which correspond to the 'Liabilities to non-monetary sectors - Total' in Table 1.4.

As from April 30, 1999 SKIS has been implemented in the sectorial distribution of the economy and therefore:

- the sector *Enterprises and non-profit institutions* comprises the data on SKIS Sectors *Non financial corporations* and *Non-profit institutions serving households*;
- the sector *Total General government* comprises the data on SKIS sector *General government*;
- the sector *Individuals* comprises the data on SKIS sector *Households*;
- the sector *Non-monetary financial institutions* comprises the data on *Savings banks* and *Savings cooperatives* as well as the data on SKIS sector *Other financial institutions*.

Table 1.7.: Deposit Money Banks' Claims to Non-residents

The Table shows banks' claims to non-residents by currency- Tolars and foreign currencies. Deposit Money Banks' Claims to non-residents are shown in Table 1.4. in item 'Total – Foreign assets'.

In February 2003 was item *Deposits* diminished by the amount - claim based on currency swap of domestic banks with central banks, for period from April 2000 on. (More in Methodological notes for Table 1.3. - *Repurchase*). Item Total claims on non-residents was diminished accordingly.

Table 1.8.: Deposit Money Banks' Liabilities to Non-residents

The Table shows banks' liabilities to non-residents broken by currency- Tolars and foreign currencies. Deposit Money Banks' Liabilities to non-residents are shown in Table 1.4. in item 'Total – Foreign liabilities'.

Table 1.9.: Bank of Slovenia 10-day balance sheet

In April 2002 the definition of base money has been changed to the sum of: *Banknotes in circulation*, *Banks' settlement accounts*, *Oversight deposit* and *Other deposits at the Bank of Slovenia* (Savings banks' settlement accounts, Savings banks' and Savings and loan undertakings' reserve accounts, transactional accounts of the Central and Local Government).

The data time series have been recalculated according to the change in definition.

The off balance items *Buy/sell foreign exchange swap* and *Sell/buy foreign exchange swap* are from April 2003 on are included in the table.

Bank of Slovenia 10-day balance sheet together with off balance items is in terms agreed for publication shown on web page:

http://www.bsi.si/html/eng/financial_data/hit/balance_bs_dekadna.html

2. FINANCIAL MARKETS

Interest rates (Table 2.1. - 2.6.)

Annual interest rates.

r = real rate over Tolar indexation clause

r(D) = real rate over foreign exchange indexation clause

n = overall nominal rate

TOM = Tolar indexation clause

EUR = foreign exchange clause

Table 2.1.: Bank of Slovenia Interest Rates

Discount rate (End of period): Indicative rate posted by the Bank of Slovenia. It was abolished as of 1stJanuary 2003.

Lombard loan: Within the framework of standing lombard facility Bank of Slovenia provides one-day lombard loans to banks and savings banks with Bank of Slovenia Bills or Government Securities used as collateral. The pledged securities should amount to 110% of the amount of lombard loan. Interest rate for lombard loans is determined with the Decree on lombard loan interest rate and interest rate for overnight deposit.

Interest rate on banks' obligatory reserves: 1 percent per year since October 1991.

Penalty rate is an official penalty rate set by Bank of Slovenia. Penalty rate is generally used in cases of overdue payments. Penalty rate is equal to 17% since 28.06.2003.

Repo interest rate for loans granted on the basis of temporary purchase of Bank of Slovenia's Bills in foreign currency with obligatory repurchase in 7, 28 or 60 days is the weighted arithmetic average of daily repo interest rates (28 - day repo was abolished in August 2000 and 60 - day repo in February 2003). The repo interest rate is given as the effective interest rate.

The overnight-deposit interest rate is an interest rate applying to the deposits placed by banks and savings banks on an overnight term with the Bank of Slovenia.

Bank of Slovenia uses *liquidity loans* to regulate liquidity of the banking system, and occasionally for regulation of base money. *Liquidity facilities of last resort* are permanently available to banks and saving banks (till March 2001 only to banks) in case of unexpected liquidity constraints. The interest rate applied is the penalty rate. It was abolished with October 2002.

The annual averages of interest rates are computed as simple arithmetic averages of monthly data, if such data are available.

Table 2.2.: Interbank Money Market Rates and Indexation Clause

Interbank market

The figures are annual nominal interest rates for loans or deposits on the interbank market. Interest rate for overnight deposits (SIONIA) is weighted average interest rate for overnight deposits. Interest rate for deposits till 30 days is weighted average interest rate for deposits with maturity till 30 days.

The annual averages of interbank interest rates are computed as simple arithmetic averages of monthly data.

Tolar indexation clause

Tolar indexation clause (TOM) is annual interest rate, calculated by the Statistical Office of Republic of Slovenia and used for preserving the value of financial liabilities and assets in domestic currency.

TOM (monthly): since 5th August 1995: average of previous 3 months' inflation (until June 1995 indexation was based on so called R that was equal to the previous months' inflation rate, from 1st June till 4th August 1995 indexation was based on the average of previous 3 months' inflation); since February 1996: 4 months; since December 1996: 6 months; since May 1997: 12 months.

Financial liabilities and assets in domestic currency, with maturity exceeding 1 year, are revalued with TOM.

Financial liabilities in domestic currency, with maturity less than 30 days, are not revalued from September 1995. Since July 2002 financial liabilities and assets in domestic currency, with maturity less than 1 year, are not revalued.

Foreign exchange indexation clause

Monthly rate is growth rate of Bank of Slovenia's end of month exchange rate for EUR (DEM) or USD.

Annual rate is computed from monthly rate on the conform basis, taking into account the actual number of days in the month and in the year.

Figures for 1993 to 1998 in columns 5, 7 and 9 represent growth of the category in the period December to December.

Table 2.3.: Interest Rates for Bank of Slovenia Bills

Tolar bills are registered securities subscribed by banks and savings banks with maturity of 60, 270 days (Tolar bills with maturity of 7, 14 and 30 days were abolished on 3rd of April 2000, bills with 2-day maturity were abolished as of 1st July 2001, 12-day tolar bills on 21st of December 2001 and 360-days tolar bills on 14th 2002). All bills are offered on a permanent basis except for 270 - day bills, which are sold by auction. Interest rates for tolar bills are nominal given.

Bills with warrants were short-term securities, issued in series of nominal value of half a million Tolars. They were purchased in Tolar at a discount and bear the p.a. nominal interest. The warrant attached to the security represented a hedge against inflation and exchange rate depreciation higher than officially projected. Interest rate for the last edition of the bills was indicated. Bills with warrants were abolished on 25th May 2000.

Twin bills were short-term bearer securities, issued in series in paper form. Through banks they are available to other legal persons and households. They were composed of a Tolar and a foreign currency part and were sold in Tolars at a discount, with redemption in Tolars and in German Mark. The Tolar part was revalued by Tolar indexation clause (TOM). Twin bills were abolished on 16th March 2000.

Foreign currency bills are transferable registered securities not issued in series. They are offered on permanent basis and can be purchased by banks and by other legal persons through banks. They are sold for Euros (till 16.02.1999 for German Marks) or US Dollars at a discount with maturities of two to four months (foreign currency bills with maturities of 180, 270 and 360 days were abolished by March 2001). Interest rates for a certain type of bill in the table are those last valid in a period.

Table 2.4.: Average Commercial Banks' Interest Rates

Average interest rates (r and $r(D)$) are weighted arithmetic averages of the minimum and maximum interest rates.

Spread is the difference between the weighted minimum and maximum interest rate: $r_{\min}=r - \text{spread}$, $r_{\max}=r+\text{spread}$.

Nominal interest rates (n) are total annual interest rates.

The figures for the latest month are always provisional; updated figures in the following Monthly Bulletin are not marked with sign *.

With September 1995 was abolished the revaluation with the tolar indexation clause for obligations in domestic currency till 30 days, with July 2002 also revaluation for all loans and deposits in domestic currency with maturity less than 1 year.

Note 1: With the 1st July 2002 the "Law on changes and completions of the law on penalty rate and tolar indexation clause" came into force. It prohibits the use of tolar indexation clause for assets and obligations in domestic currency with the maturity less than 1 year. At the same time have most banks also stopped using the foreign exchange clause for short-term loans and deposits, which has reduced the number of reporting banks and led to series breaks.

Table 2.5.: Average Effective Commercial Banks' Interest Rates

Average effective interest rates are calculated on the basis of the interest accounted in the period.

Because of the change in the frame of accounts for banks and savings banks since May 2002 the revalorization and interest incomes are no more represented separately, so the calculation of the real effective interest rates are no longer possible.

Table: Breakdown of banks' assets and liabilities by type of Indexation Clause

		Loans			Deposits			Total

Network of Commercial Banks (Table 2.7.)

Table 2.7.: Network of Commercial Banks

Note 1: In the number of head offices two banks with the license for operation pursuant to the Constitutional Law only are included (Kreditna banka Maribor d.d. and Ljubljanska banka d.d. Ljubljana).

Note 2: Statistical Regions, Source: Statistical Office of the Republic of Slovenia, March 31, 2000. Data

up to year 2000 are presented according to Standard Classification of Territorial Units - Statistical Regions of the Republic of Slovenia, January 1, 1999.

Note 3: Data referring to the Postal bank of Slovenia do not include units of the Post of Slovenia that operate for the Postal bank of Slovenia on the contractual basis.

Note 4: Source: Statistical Office of the Republic of Slovenia: Rapid Reports, Population, No. 159 / 2002.

ATM: *Automated teller machine* that permits the withdrawal of cash from accounts using plastic (cheque) cards and the use of other services (balance inquiries, transfer of funds, etc.).

EFTPOS: *Electronic funds transfer at the point of sale*: the term refers to the use of payment cards at the retail location where the information is captured and transmitted by electronic terminals.

Modern Payment Instruments (Tables 2.8.)

2.8.1. Payment cards

Note 1: *Credit cards*: A card indicating that the holder has been granted a line of credit. The credit granted may be settled in full by the specific date each month (delayed debit card ie. charge card), or may be settled in part, with the balance taken as extended credit (credit card).

Note 2: *Debit cards*: A card which enables the holder to have purchases directly charged to funds on the cardholder's bank account.

Note 3: *Cards, issued abroad*: payment cards issued abroad and used for payments in Slovenia, mostly by non-residents.

Note 4: *Volume and value of transactions abroad*: use of cards issued in Slovenia for payments abroad.

Number of payment cards in circulation: number of valid payment cards held by residents and non-residents, issued in Slovenia. Data refer to the end of each quarter/year.

Number and value of payments refer to the use of payment cards in each quarter/year.

Domestic cards: payment cards issued by banks and enterprises residents in Slovenia without licence agreements with foreign issuers.

Licence cards: payment cards issued by banks and enterprises residents in Slovenia under licence agreements with foreign issuers.

Bank card: payment cards issued by banks.

Retailer cards: payment card issued by non-banking institutions, mostly for use at specific retail outlets.

Personal cards: payment cards issued to natural persons (family cards included).

Business cards: payment cards issued to legal entities.

2.8.2. Other Modern Payment Instruments

Note 1: Data refer to the end of each quarter.

Note 2: Data refer to transactions with credit and debit cards in Slovenia. Relevant data for previous periods are not available.

Note 3: Data refer to personal computer banking via Internet. Only debt transactions are included.

Ljubljana Stock Exchange (Tables 2.9. to 2.11.)

Table 2.9.: The Ljubljana Stock Exchange: Turnover by Market Segment and by Type of Securities

Shares – Privatization Investment Funds shares are not included.

PIF - Privatization Investment Funds shares.

Turnover is measured by a single counting.

Table 2.10.: The Ljubljana Stock Exchange: Market Capitalization and Turn-over Ratio

Market capitalization by market segment and by type of securities is calculated as the sum of market capitalization of individual securities. Market capitalization of an individual security is calculated as the product of the number of listed securities and the market price at the end of period.

Turnover ratio is calculated as turnover in a period divided by market capitalization at the end of period.

Short-term securities are not included in calculations of market capitalization and turnover ratio.

Table 2.11.: The Ljubljana Stock Exchange: Slovenian Stock Exchange Index and Bond Index

SBI - Slovenian Stock Exchange Index (index value: January 1994=1000)

BIO - Bond Index.

SBI, BIO - value of SBI and BIO at the end of period.

dT - change of index value by points.

d% - change of index value in percentage.

Min, Max - minimum and maximum value of index in a period.

Exchange rates (Tables 2.12.1. to 2.13.4.)

Tables 2.12.: Selected Bank of Slovenia Exchange Rates- Average Rates

The tables show Bank of Slovenia middle rates. Annual rates are computed as arithmetical averages of monthly rates. Monthly averages are computed as arithmetical averages of daily rates (Sundays and holidays are not included).

As from 1st January 1999, with introduction of European Monetary Union, the European Currency Unit (XEU) was replaced by the Euro (EUR) at the exchange rate 1 :1. Fixed exchange rates between the Euro and the national currencies of the EMU Member States (valid from 1st January 2001):

1EUR =	40.33990 BEF
=	1.95583 DEM
=	340.75000 GRD
=	166.38600 ESP
=	6.55957 FRF
=	0.78756 IEP
=	1936.27000 ITL
=	40.33990 LUF
=	2.20371 NLG
=	13.76030 ATS
=	200.48200 PTE
=	5.94573 FIM

Due to the introduction of Euro in January 2002 the exchange rates of members of EMU currencies (ATS, FRF, DEM, ITL) are replaced by the exchange rates of some EU accession countries (CZK, HUF, PLN, SKK).

Introduction of a new currency, the Kuna (=1,000 previous Croatian Dinars) on 30th May 1994. The Polish zloty was denominated on 1st January 1995 at the exchange rate 1 new zloty for 10.000 old zlotys.

Tables 2.13.: Turnover and Foreign Exchange Market

Annual rates are computed as arithmetical averages of monthly rates. Monthly rates are averages computed from daily rates on working days, weighed with turnover. Foreign currency exchange offices also report transactions on Saturdays, not shown in the table, but included in the monthly and annual totals.

Totals also include transactions between banks and enterprises and between banks solely. In addition to that the transactions between enterprises are included until 30th September 1999 and the transactions of banks with non-residents and households from 1st October 1999.

On the spot exchange market the timing of settlement is at latest 2 working days from the agreement. The forward exchange market is designed for transaction where the timing of settlement is at least 2 working days after the agreement.

The data by the contract agreement are defined by the agreement time of the transaction. The data by the contract settlement are time defined by the settlement time of the transaction.

Data for the turnover on the forward exchange market are available from October 1999. Also the data for

turnover by the settlement are available only from October 1999.

3. BALANCE OF PAYMENTS AND EXTERNAL POSITION

Balance of Payments (Tables 3.1. to 3.4.)

General notes

In most respects the Slovenian Balance of Payments (BOP) conforms to the methodology of the IMF's *Balance of Payments Manual, fifth edition (1993)*.

Notice

From 2003 onwards Bank of Slovenia will stop publishing balance of payments data calculated in USD. Balance of payments data will be published only in Euro and in national currency.

Characteristics of the Data

Minus sign (-) indicates imports or surplus of imports over exports in the current account, increase in assets or decrease in liabilities in the capital and financial accounts, and growth of reserve assets. Data for transactions are converted from original currencies to USD using the daily Bank of Slovenia exchange rates, or average exchange rates of the period if the exact date of transaction is not known.

Revision policy

Bank of Slovenia revises the yearly data (t-1) for balance of payments when the i.i.p. data and final goods data for the corresponding year (t-1) are available (end-August). At the same time data for the period (t-2) are revised. In case of major methodological changes or data sources' discrepancies data for the period (t-3) are revised as well

Data sources

BOP is compiled on the basis of monthly available data on transactions (ITRS), stock positions and estimates.

- Reports on transactions
 - accounts of domestic banks held with correspondent banks abroad (including the central bank),
 - nonresident accounts held with domestic banks,
 - non-bank resident accounts abroad,
 - other accounts between residents and nonresidents,
 - payments between residents and nonresidents in Slovenian Tolars.

Classification of transactions is using the descriptions of transactions provided by the banks' clients;

- **Customs declarations;**
- **Reports to the Bank of Slovenia on registered credits granted to and disbursed abroad;** For the period from 1997 also data on nature of direct payments from foreign creditors, which settle liabilities of domestic debtors to other nonresidents, are available from these reports.
- **Yearly surveys on balance and transactions with affiliated enterprises (SN)** is a source for reinvested earnings of direct investments.
- **Accounting data of the Bank of Slovenia;**
- **Commercial banks balance sheet data;**
- **Estimates.**
- **Monthly survey of duty free shops.**

There are several estimation models used in the BOP for the valuation of data on imports, incoming travel, labor income, Italian pensions (till the end of 1998), short-term commercial credits, foreign currency and deposits of resident households.

Current account

Goods

Data for the General merchandise are based on customs declarations. Data on imports c.i.f. and exports f.o.b. are compiled by the Statistical Office. **Adjustments for valuation** of data on imports and **coverage** of data on imports and exports are made by the Bank of Slovenia. The imports data are adjusted from c.i.f. basis to f.o.b. basis by the coefficient which is equal to the weighted average of coefficients between the c.i.f. and f.o.b. values of imported goods (for the available sample), separately calculated for each type of merchandise, transport means and country of the exporter. The **coverage adjustments** are made for goods imported without customs declaration and for which data are available from ITRS or reports of duty free shops and consignment warehouses.

Services

Transport

The source for recording transportation services is the ITRS.

Travel

The ITRS sources used in the compilation of the ***incoming travel*** item include: a.) health and education related services, b.) payments made by nonresidents to Slovenian tourist agencies, c.) net withdrawals in tolars from nonresident accounts, d.) money spent in casinos by nonresidents, e.) data on sales of goods to nonresidents in duty free shops and consignment warehouses, f.) payments with credit cards and g.) sales of Tolars to nonresidents abroad.

The data on sales of Tolars to nonresidents in Slovenia are estimated on the number of border crossings of foreign travellers and on the number of nights spent by foreign tourists.
Data source for the item expenditure on travel are ITRS and estimations.

Construction services

The source of data is ITRS. All construction works are recorded under construction services.

Insurance services

Premiums on life and non-life insurance are split into two components: (i) the service charge included in insurance services and (ii) the premium in a narrow sense recorded as current transfer. The calculation of service charge is based on a fixed percentage of the premium payments.

Government services

All transactions settled through accounts of Slovenian embassies abroad as well as transactions coded as government services settled through accounts of Slovenian banks with foreign correspondents are included in this item.

Income

The ITRS is used as a main source for recording of ***compensation of employees***. As many wages are not paid through domestic banks, supplementary estimations of such receipts from the neighboring countries are made. Data on ***reinvested earnings and income on equity*** are available in an annual survey of Slovenian direct investors abroad and of foreign direct investment enterprises in Slovenia. The present recording of ***other investment income*** (interest income) is based on the actual payments.

Current transfers

In this item workers' remittances, insurance and other transfers of other sectors are included. The insurance item is calculated as a difference between the insurance premiums received and the claims paid on the credit side and vice versa on the debit side. The main source for other transfers are the ITRS and the customs documents.

Capital and financial account***Capital account******Capital transfers***

Migrants' transfers covers not only payments recorded by domestic banks but also the changes in residency of accounts held with these banks.

Financial account***Direct investment***

Direct investment is recorded on the basis of reporting of payments through domestic banks and of data from customs declarations. Data on reinvested earnings is based on yearly surveys on balance and transactions with affiliated enterprises (SN) and are included monthly as one twelfth of the yearly figure.

Until 1997 purchase and sale of all shares and equity have been included in this item.

From the beginning of 1997, purchase and sale of shares that assure more than 50 percent of company's equity, a control package of shares, shares issued by domestic companies on the primary markets with the purpose to increase the nominal capital of the company are included in this item, due to capital control measures. With the new Foreign Exchange Act in 1999 direct investment 10% rule is applied.

From 2001 onwards inter-company debt transactions between affiliated enterprises (10 percent or more capital share) are recorded as direct investment - other capital transactions. Until 2001 this kind of transactions are recorded as loans.

Portfolio investment

Until 1997 only data on sales and purchases of debt securities through banks were included in this item. Since February 1997 equity securities, not having the characteristics described in the note on Direct investment are included in this item too. With the new Foreign Exchange Act in 1999 portfolio investment transactions include all transactions below the 10% rule.

Loans

From 2001 onwards inter-company debt transactions between affiliated enterprises (10 percent or more capital share) are not recorded as loans, but are recorded as direct investment - other capital transactions.

Other investment

Other investments except equity between affiliated enterprises are included here and not under Direct investment. Short-term trade credits are estimated and recorded on net basis as change of assets. Estimation is based on comparison of data on imports and exports from customs declarations with corresponding settlements. Item currency and deposits of households is estimated by using data on net pur-

chases of foreign currency in foreign exchange offices, net deposits to households' foreign exchange accounts at domestic banks, estimated expenditure of resident households abroad (see Travel).

Tables 3.1.: Balance of Payments 1988 - 1992

Excluding transactions with former Yugoslav Republics; processing is included in services, excluded in merchandise.

Note 1: For 1988 and 1989, Official sector data is included in Other sectors.

Note 2: For 1988 through 1990, Statistical errors include sales of claims from bilateral agreements to the former National Bank of Yugoslavia and its purchases of foreign currency through Slovenian foreign currency exchange offices.

Note 3: Reserve assets of the Bank of Slovenia.

Tables 3.2. and 3.4.: Balance of Payments

The data for the current year are revised monthly. Data become final according to the revision practice (see revision practice).

In June 2001 Slovenia acquired 16.39% share in holdings of former Yugoslavia with BIS (Bank for International Settlements), consisting of gold 16.9 mio SIT (EUR 77.8 million), foreign currencies 1.1 mio SIT (EUR 5.3 million) and shares 3.0 mio SIT (EUR 13.8 million). This transaction is not considered to be a balance of payments' flow, but a part of 'other changes' item, which reconciles the international investment position in consecutive periods.

Note 1: CD: customs declarations - foreign trade definitions (Statistical Office of Republic of Slovenia).

Note 2: June 1996: includes issue of government bonds in exchange for a part of allocated foreign debt in the amount of 63.7 mio SIT (EUR 374.9 million). Banks' liabilities under foreign loans are decreased for the same amount and transferred to liabilities to Government.

Note 3: Issues of government bonds:

- August 1996 (EUR 253.7 million);
- June 1997 (EUR 205.1 million);
- May 1998 (EUR 500.0 million);
- March 1999 (EUR 400.0 million);
- March 2000 (EUR 400.0 million) and in February 2001 (EUR 100.0 million);
- April 2001 (EUR 450.0 million).

Note 4: For 1993 and following, short-term claims include net changes in commercial credits (received and granted).

Note 5: Includes mostly BS fiduciary accounts. In June 1996 the amount of 21.2 mio SIT (EUR 124.9 million) was transferred to regular BS reserve accounts.

Note 6: Use of IMF credit (assumed upon membership in January 1993).

Note 7: Reserve assets of the Bank of Slovenia.

Note 8: The data for reinvested earnings for the year 2003 is not available yet, therefore a five-year average (from 1998 to 2002) of reinvested earnings is included as an estimation in 2003. In the year 2004 this estimation will be replaced with the actual data for reinvested earnings for the year 2003.

Note 9: From 2001 there is a time series break on the items direct investment and loans. From 2001 inter-company debt transactions between affiliated enterprises (10 percent or more capital share) are included in the direct investment item, before that they were included in loans item.

Table 3.5: Merchandise trade

Exports f.o.b. and imports c.i.f. Years 2003: provisional data (Source: Statistical Office of RS).

The effective exchange rate: Growth of index denotes growth of value of Tolar, and vice versa.

Note 1: Romania became a member of CEFTA on July 1, 1997. According to SORS its data are included in CEFTA figures also for previous periods.

Note 2: Bulgaria became a member of CEFTA on January 1, 1999. According to SORS its data are included in CEFTA figures also for previous periods.

3.6 Short-term commercial credits

Tables include positions of claims and liabilities of short-term commercial credits by countries/groups of countries in the last eight months. Data source is direct reporting of enterprises (reports SKV).

International Investment Position of Slovenia (Table 3.7.)

General notes

The international investment position is the balance sheet of the stock of external financial assets and liabilities. The financial items that comprise the position consist of claims on nonresidents, liabilities to nonresidents, monetary gold, and SDRs.

Methodology of the international investment position (IIP) of Slovenia is based on the fifth edition of the *Balance of Payments Manual*, IMF, 1993. The Manual distinguishes four sectors - monetary authorities, general government, banks, and other sectors.

Data sources

Data sources for the international investment position of Slovenia are mainly the same as those for the balance of payments financial account. However, there are differences with some items as follows:

Direct investment

Data on direct investment are collected from:

- concessional surveys on equity investment (SN),
- reports on loans granted to or received from nonresidents,
- short term commercial credits with nonresidents (SKV),
- reports on accounts abroad.

Source for the balance of payments is *international transactions' reporting system* - ITRS and reports on loans granted to or received from nonresidents.

In accordance with the recommendations of IMF, this item comprises investment where direct investor owns 10 percent or more of ordinary shares or voting power. Equity shares are valued at book value according to the accounting standards. Reinvested earnings are included.

Claims on and liabilities to affiliated enterprises are included in direct investment-other capital item. Inter-company claims or liabilities between affiliated banks and affiliated financial intermediaries recorded under direct investment capital are limited to those associated with permanent debt (loan capital representing a permanent interest). Until 2000 all long term intercompany claims are liabilities between affiliated banks and affiliated financial intermediaries were included in this item (not only permanent debt).

Data on claims and liabilities of Slovene enterprises in indirectly affiliated enterprises from 1996 onwards are included in the item 'Direct investment abroad' (in case when enterprise abroad having Slovene direct investment holds 10% or more of equity in other foreign enterprise). In the item 'Direct investment in Slovenia' data on investment of foreign enterprises in indirectly affiliated enterprises in Slovenia are included (in case that Slovene enterprise with foreign direct investment holds 10% or more of equity in other Slovene enterprise).

Portfolio investment

Data on equity securities and other equity shares are also available from enterprises' surveys (form SN), but only data from surveys where direct investor owns less than 10 percent of ordinary shares or voting power, are included. (In the balance of payments, transactions with equity securities and other shares are collected from ITRS (see note to Tables 3.1. to 3.4. /Capital and financial account/Portfolio investment)).

Data on residents' holdings of debt securities are available from direct reports from banks, and brokerage houses. For the balance of payments these data are collected from ITRS.

Liabilities of debt securities of government, banking and other sectors are available from credit registration from and Central Securities Clearing Corporation.

Trade credits and loans

Source for short-term trade credits are *reports of enterprises on stock of external claims and liabilities* (form SKV). (In the balance of payments the item short-term commercial credits is estimated.) Sources for long-term trade credits and loans are credit registration forms and are the same for the international investment position and the balance of payments. Until 2000 the balance of payments did not distinguish loans between affiliated companies from loans between unaffiliated companies and included all loans in other investment items.

Currency & deposits, other assets, other liabilities and reserve assets

Sources of data for these items are banks' reports and Bank of Slovenia accounting data and are consistent with those for the balance of payments.

In the IIP arrears on loans and long term commercial credits are included in other claim/liabilities as short term item. Balance of payments does not include arrears.

The item "Assets / Currency and deposits of other sectors" in international investment position also includes data from the Bank for International Settlements (BIS) on deposits of Slovenian households in the banks in member states of BIS.

The item "Other liabilities of other sectors" in the IIP consists of the data on contractual joint ventures, which are not available for the balance of payments.

Table 3.7.: International Investment Position of Slovenia

IIP data do not include:

- data on real estate owned by Slovenian households abroad (mainly real estate in Croatia),
- claims on other countries on the territory of former SFR Yugoslavia, subject of negotiations on succession, expropriated assets in these territories and other assets transferred to the Slovenian government during the process of privatization.

Additional data on Direct Investment are available in a special publication of the Bank of Slovenia: 'Neposredne naložbe – Direct Investment' and on Bank of Slovenia Web site: <http://www.bsi.si/html/eng/publications/index.html>.

Gross External Debt (Tables 3.8 to 3.11)

General notes

Methodology is based on External Debt Statistics: Guide for Compilers and Users, IMF, 2003.

The guide is available under the following web address:

<http://www.imf.org/external/pubs/ft/eds/Eng/Guide/index.htm>.

Data sources

Gross external debt consists of debt liabilities from the international investment position (IIP). Data sources for Tables 3.8 to 3.10 are the same as those for the international investment position excluding the data on direct investment.

Table 3.8 Net External Debt

The table presents gross external debt, gross external assets in debt instruments, and net debt position. The data are the same as presented in the international investment position (IIP). The net external debt position is equal to gross external debt deducted by gross external assets in debt instruments.

Table 3.9 Gross External Debt

Gross external debt, at any given time, is the outstanding amount of those current, and not contingent, liabilities that require payment(s) of principal and/or interest by the debtor at some point(s) in the future and are owed to non-residents by residents of an economy. The types of financial instruments included in the presentation of the gross external debt position are as follows: debt securities (money market instruments, bonds and notes), trade credits (short- and long-term), loans (short- and long-term), cash, deposits and other debt liabilities. Maturity for debt liabilities is based on the formal criterion of original maturity. Long-term debt is defined as debt with an original maturity of over one year or with no maturity stated. Short-term debt, which includes cash, is debt repayable at notice or with an original maturity of one year or less.

Debt instruments are valued at nominal value. Accrued interest is excluded.

Before July 2003, gross external debt was presented in Table 3.9 External Debt and in Table 3.12.2 International Investment Position of Slovenia - Liabilities:

Stocks as at 31 December 2002				bil. of EUR	
NET POSITION		1,4	=	NET POSITION	1,4
CLAIMS-total		13,6	=	CLAIMS-total	13,6
LIABILITIES-total		15,0	=	LIABILITIES-total	15,0
EQUITY AND EQUITY SECURITIES		3,5	=	EQUITY AND EQUITY SECURITIES	3,5
DEBT LIABILITIES		11,5	=	GROSS EXTERNAL DEBT	11,5
EXTERNAL DEBT (World Bank concepts - Grey Book)		8,4			
Long-term debt		8,3			
Public and publicly guaranteed		3,1			
Private non-guaranteed *		5,2		Public and publicly guaranteed debt **	3,2
Short-term debt	*	0,1	4,7 →	Private non-guaranteed debt	8,3
DEBT INSTRUMENTS INCLUDED ONLY IN TABLE					
INTERNAT. INVESTMENT POSITION OF SLOVENIA					
Money market instruments - general government **		0,1		Part of debt instruments of private	
Short-term trade credits - other sectors		1,7		non-guaranteed gross external debt-total	3,6
Currency and deposits-banks		0,7		Short-term trade credits	1,7
Other liabilities-banks and other sectors		0,2		Currency and deposits	0,7
Liabilities to direct investors and affiliated enterprises				Other debt liabilities	0,2
Short-term trade credits		0,4		* Liabilities to direct investors and	
				affiliated enterprises	1,0

*Liabilities to direct investors and affiliated enterprises are not broken down by debt instruments (concept of new standard). An amount of 1.0 bil. of EUR included: 0.4 bil. of EUR short-term trade credits and 0.6 bil. of EUR loans (short- and long-term)

** Data from Central Securities Clearing Corporation

Table 3.10 Debt – Service Payment Schedule

Service payments projected are estimates of payments due on existing debt outstanding and do not include interest rate changes.

Table 3.11 Debt indicators

Note 1: Short-term debt includes the value of short-term external debt outstanding (original maturity) and the value of long-term external debt outstanding (original maturity) due to be paid in one year or less.

International Liquidity (Table 3.12.)**Table 3.12.: International Liquidity**

Foreign exchange reserves of the Bank of Slovenia and banks include foreign cash in convertible currencies, deposits abroad and first class securities of foreign issuers. Balances on fiduciary accounts are included in 'Other foreign assets'.

Foreign exchange reserves of banks are only part of item 'Foreign Assets' in Table 1.4. Foreign assets also include other foreign currencies, deposits abroad, foreign securities and other foreign assets, which do not have the nature of high liquid international funds.

4. GENERAL ECONOMIC INDICATORS**Table 4.1.: Derivation and Expenditure on Gross domestic product**

Data for 1999 are partially estimated.

Table 4.2.: Quarterly real gross domestic product

1999 - 1994: constant prices 1992; reference year 2000;
1995 - 2000: constant prices 1995; reference year 2000;
2000 and following: constant prices 2000;

Table 4.3.: Industry

Data for production with breakdown by industries for years 1992 to 1993 and employment for years 1992 to 1995 are estimations based on methodologies used in those years.

Table 4.5.: Employment and unemployment

The majority of data for the period before 1997 are estimations based on methodologies used in those years.

Table 4.6.: Average wages

Real wages are deflated with consumer price index.

Table 4.7.: Registered households' income

Real aggregates are deflated with consumer prices index.

5. PUBLIC FINANCE**Table 5.1.: General Government Revenues and Expenditures**

Note 1: The data of the current and previous year are revised monthly until the data on previous year became final.

Tables 5.2.: General Government Lending, Repayments and Financing

General Government Operations (Consolidated state budget, local governments, pension fund and health insurance fund).

Note 1: The data of the current and previous year are revised monthly until the data on previous year became final.

Tables 5.3.: Debt of Republic of Slovenia

Republic of Slovenia is defined as a legal person. The data from tables 5.1, 5.2. and 5.3. originate in the Bulletin on Government Finance, published by the Ministry of Finance.

* The period to which data to be released relate is shown in parentheses. NLT stands for *no-later-than*.

** Adaptation of the base year and of the sample of reporting units will cause the delay of January data by one month - end of March 2004.

Financial and external sector data (except Merchandise trade) are first disseminated on the Bank of Slovenia Internet website, and later in the Bank of Slovenia Monthly Bulletin. At the end of business week, the precise dates of release during the following week are published on the Bank of Slovenia Internet website (http://www.bsi.si/html/eng/financial_data/hit/adv_rel_cal.html).

¹The data on interest rates are published by the Bank of Slovenia and Ministry of Finance separately.

²Data on representative interest rate of the BoS and interbank money market rates are disseminated whenever the change occurs.

³Data are disseminated daily on Bank of Slovenia's page Currency Exchange rates - for display (http://www.bsi.si/html/eng/financial_data/daily/tecajna_lista.asp) and on Archive of financial data (http://www.bsi.si/html/eng/financial_data/arhiv/index.html).
